A Letter from the Deputy Director-General: General Education and Training

Dear Teacher

The Foundations for Learning Campaign has been launched to focus the system on the improvement of learner performance in literacy and numeracy. The enclosed document provides you with support as you monitor learner progress in these learning areas.

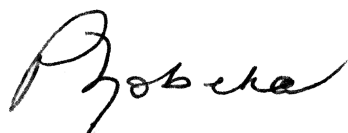

In this document you will find that:

- The milestones¹ (knowledge and skills) derived from the Learning Outcomes and Assessment Standards from the National Curriculum Statement for Languages and Mathematics (Grades 1-3) have been packaged into four terms for each grade to facilitate planning for teaching. These milestones explain the content embedded in the Learning Outcomes and Assessment Standards.
- These milestones have been further written into manageable units to assist you to develop the required assessment tasks per term; and
- Rubrics for the last assessment task per term have been provided so that schools and districts can develop a common assessment task. The results of which are to be communicated to the District Office.

NB: the annual assessment of learners that will be set by the Department of Education will be based on these quarterly assessment tasks.

I trust that you will find this document a valuable resource.

Kind regards

Ms Palesa Tyobeka

Deputy Director-General: General Education and Training

Date: 11 April 2008

¹ The term "milestones" is used to indicate the expected level of development of our learners' progress to becoming literate and numerate. It gives a sense of what their achievements could be at given points in the school year.

A Note on the Numeracy Assessment Tasks

The National Policy on Assessment for Schools stipulates that three assessment tasks in Numeracy should be formally assessed each term. These tasks cover the essential milestones expected for that term (refer to pages 3-6 in this document). **The Learning Outcomes and Assessment Standards used to develop assessment tasks are stated in the Work Schedule and are further described in the Numeracy Programme of Assessment.**

Use the milestones to ensure your Work Schedule covers the required knowledge, skills and values for teaching and learning demonstrating conceptual progression. Not everything taught needs to be *formally* assessed. However, it is essential that you continuously assess your learners' progress through both a formal and an informal assessment programme, as this informs your daily planning.

For each Assessment Task, you must design two or more activities that will allow learners to **demonstrate** the skills, knowledge and values you are assessing i.e. the criteria from the Assessment Standards. Use the holistic rubrics, checklists and rating scales provided, as well as other assessment tools to observe, assess and record every learner's understanding.

You need to ensure that assessment is not only done as written work, but allows for practical and oral work too (forms of assessment). The Assessment Task, therefore, needs to be infused into your normal teaching and learning time over a period of time e.g. 5-7 consecutive days. Allow learners to have access to counters, number lines, number charts etc if they need them, **even during an assessment task**. You want to assess what learners understand and not what they can just memorise. Your recorded assessment is against the whole task, using the National codes and level descriptors.

Explanation of terminology

In describing the knowledge, skills and values derived from the assessment standards for teaching, learning and assessment in each term, the following terms have been used in the document and are explained below:

- **Numerosity** : the profile of the number i.e. what is the number? The profile of 7 would include the following: $7 = 7+0$, $6+1$, $5+2$, $4+3$, $8-1$, $9-2$, $10-3$, half of 14, a third of 21, double $3\frac{1}{2}$, double 5 minus 3, $3 \times 2 + 1$, etc. In other words, the numerosity of a number tells us all about the number. The greater the learners' understanding of numbers is, the larger the profile of the number will become e.g. a Grade 1 learner will be able to say '7 is 3 less than 10, or 6 more than 1' while a Grade 3 learner will be able to say '7 is a quarter of 28, or double 10 minus 13'.

- *Word Problems* : Learners will be exposed to word problems verbally and in written form. Teachers should help learners to read a written problem (in printed text), Language (words) is used to give context to numbers and operations. Problems are used in Mathematics to develop and extend concepts, so learners need to be exposed to both routine as well as non-routine problems regularly.

4. Double odd and even numbers up to 500?				
5. Halve odd and even numbers up to 500?				
6. Recognise a three-dimensional object from different angles? e.g. a book from the top, from the side, from the corner, etc.	Any two correct	Any three to five correct	Any six to eight correct	All ten correct
7. Solve division problems, both grouping and sharing, where there is a remainder?				
8. Solve division problems, both grouping and sharing, where the remainder is a fraction?				
9. Solve money problems where rands are converted to cents?				
10. Solves word problems, including all four operations using numbers to 750, and explains how the solution was reached?				

Grade 3: Term 4				
Holistic rubric for 3 rd Assessment Task: Term 4				
	1 Not achieved	2 Partial achievement	3 Satisfactory achievement	4 Outstanding achievement
<i>Is the learner able to:</i>				
1. Recognise and order numbers to 1000?				
2. Decompose three-digit numbers to 999 in a variety of ways? e.g. $498 = 400 + 90 + 8$ or $200 + 200 + 50 + 40 + 8$ or $300 + 150 + 48$				
3. Correctly add and subtract a two-digit number and a three-digit number working over the ten/hundred? e.g. $597 + 28 = ?$ $326 - 48 = ?$				
4. Add two three-digit numbers correctly?				
5. Subtract two three-digit numbers correctly?	Any two correct	Any three to five correct	Any six to eight correct	All ten correct
6. Build multiplication tables of 2, 3, 4, 5, 9, 10, 11 up to 100? e.g. $20 \times 3 = 60$, $3 \times 20 = 60$				
7. Calculate division of two-digit numbers by one-digit numbers? e.g. $70 \div 5 = ?$				
8. Read and interpret data from a simple table?				
9. Solve problems using grouping and sharing where the answer is a fraction or a remainder?				
10. Solve word problems using the four operations with numbers to 1000 (using number charts, number lines, etc. if needed) and explain how the problem was solved?				

A Note on the Literacy Assessment Tasks

The National Policy on Assessment for Schools stipulates that four assessment tasks in Literacy should be formally assessed each term. These tasks cover the essential milestones expected for that term (refer to pages 20 -27 in this document). **The Learning Outcomes and Assessment Standards used to develop assessment tasks are stated in the Work Schedule and the assessment tasks are further described in the Literacy Programme of Assessment.**

Use the milestones to ensure your Work Schedule covers the required knowledge skills and values for teaching and learning demonstrating conceptual progression. Not everything taught needs to be *formally* assessed. However, it is essential that you continuously assess your learners' progress through both a formal and an informal assessment programme, as this informs your daily planning. Do not only use the Assessment Tasks for assessing listening and speaking skills. On a daily basis you must observe your learners' *listening skills, oral competence, ability to answer questions, participation in discussions* and written recording skills where necessary.

It is important, too, that learners' understanding of what they are reading is assessed and not just their ability to recognize words. Your assessing of reading is, therefore, also continuous and not just a once-off assessment. Reading assessment should take place using a seen and prepared passage at the level of the learner, as well as using an unseen passage which everyone in the class will be expected to read.

For each Assessment Task, you must design two or more activities that will allow learners to **demonstrate** the skills, knowledge and values you are assessing i.e. the criteria from the Assessment Standards. Use the holistic rubrics, checklists and rating scales provided as well as other assessment tools to observe, assess and record your learner's level of understanding.

You need to ensure that assessment is not only done as written work, but allows for practical and oral work too (forms of assessment). The Assessment Task, therefore, needs to be infused into your normal teaching and learning time over a period of time e.g. 5 –7 consecutive days. You want to assess what learners understand and not what they can just memorise, so integrate your activities as much as possible e.g. learners may spell all their words correctly during a test on Friday, but are they able to use those same words correctly spelt when writing/ recording their personal news or a story? Recording of assessment is against the whole task, using the National codes and level descriptors.
