FOREWORD BY THE MEC FOR EDUCATION

Warm Greetings,

I feel very privileged to release this report on the National Senior Certificate Examinations. My heartfelt gratitude to the compilers of this report and to the people who administered these examinations, including schools, for the sterling work done. Indeed your good work is recognised and appreciated by the Provincial Government.

The report contains the results of the 2011 Grade 12 class, and compares them with the results of the three previous years (2008; 2009; 2010). The report also covers a realistic analysis of the critical subjects like Mathematics, Accounting, Physical Science, etc.

This (then) enables the reader to note concrete trends over these years and thus get a better and informed picture with regard to the Grade 12 performance in the Eastern Cape.

EXAMINATIONS

With high quality of question papers set by Department of Basic Education and quality assured by UMALUSI, the examination took place over a six weeks period.

Clean and smooth examinations were run over a six week period. This is a reputation that the Department has continued to build over the last ten years. We commit to keep a clean record of examinations in the Province, to build the confidence of our people.

MARKING

Marking was done in fifteen marking centres and these centres were visited by both the DBE and UMALUSI. Both DBE and UMALUSI monitors were highly impressed with the setup of the marking centres. The marking process took place over a period of two weeks. This two weeks period was characterised by clean and credible marking. Once again building on the good reputation of our Province.

CHALLENGES

The year 2011 can be classified as one of the most challenging years in the history of the Province.

The Department of Education in the Province started the 2011 academic year faced with:

- No School Nutrition.
- No Scholar Transport.
- 4249 temporary educators terminated in December 2010.
- No stationery for Section 20 schools.

These problems were mainly as a result of budget constraints, mismanagement and poor planning in some instances.

These problems also led to the intervention by National Government through Section 100(1)(b). However, through the support of the Provincial Government, the Department started to deal with these problems in the following manner:

- Implementation of new school nutrition model that resumed in March 2011.
- By a court-order, the re-instatement of the temporary educators by March 2011.
- Scholar transport, driven jointly by Department of Education and Department of Transport, resumed on 18 July 2011.
- Section 20 stationery was at Schools by July 2011.

It also took some months to have common understanding on the Implementation of Section 100(1)(b) by both Provincial Government and National Government. However, with the President coming in with a task team of five ministers and five MEC's, we began to see progress on the implementation of Section 100(1) (b).

Obviously all these problems and challenges impacted negatively on the delivery of education services and school functionality in particular. However, by the third quarter, we began to see some progress in the delivery of education in the Province.

It is in this context and against this background that the NSC candidates of 2011 wrote the final examinations and against which the Education Department releases this report.

RESPONSIBILITIES

A learner stays in our education system for an average of thirteen years, starting at Grade R and culminating with Grade 12. The Annual National Assessment (ANA) and Grade 12 results have become critical tools to judge performance of both our system and our learners.

Through examinations, parents, villagers, government and communities should be able to determine the strengths and weaknesses of both learners and the system itself. This will go a long way in helping learners to prepare themselves for their historical responsibilities.

Learners and young people in schools and other institutions of learning have only one duty today, the duty of studying; studying should be seen as a social duty. By discharging that duty, learners shall be paying all debts they may have with society and the heroes/heroines who sacrificed to make possible this present society. All this sacrifice was made to dignify schools and higher institutions of learning in South Africa for poor people, both black and white.

Learners should study more and be better every day as we all walk towards a better future. The future needs technology, culture and knowledge. Self improve on a day-to-day basis should become a necessity for all of us. Education, Science and Technology form an inseparable triad necessary for a country's development.

Our Education system must not only teach learners academic work but must also teach human values: **generosity, modesty, simplicity, solidarity, and respect for humanity, selflessness, impatience for injustice, patience and courage.**

To those who have passed the examinations, we say they must go on to utilise the opportunities opened up by our country to contribute in building a better life for our people.

To those who could not make it in 2011, we say they must not despair. To make a mistake is not a sin or disgrace. The sin is to repeat the mistake. By repeating matric you will have a better opportunity to deal with your mistake and improve your performance.

You must know that even great minds like Albert Einstein, the great scientist who is the father of the theory of relativity in physics, repeated his final high school year. He never committed suicide or dropped out of school, but committed himself to repeat and pass his final high school year.

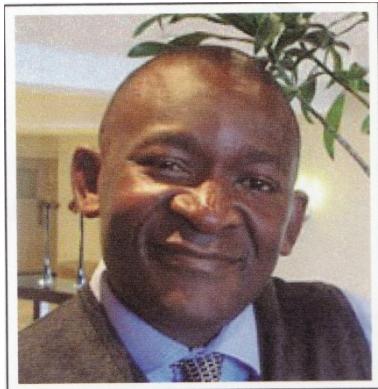

CONCLUSION

We call upon learners, teachers, parents and communities to use this report as an instrument in improving performance, career-pathing and determining progress. It takes a village to raise a child.

Education remains a major contributor in dealing with poverty and economic development.

M. MAKUPULA : MPL MEC:EDUCATION

PREFACE BY THE HEAD: EDUCATION

As I present the results of the 2011 National Senior Certificate, I do so with mixed emotions. My mixed emotions are based on the knowledge and understanding that so many people worked very hard throughout the year with high hopes and promises both to themselves and others. The culmination of this process of hard work is the final examination which although very short, evaluates work done over a period of time and does not allow correction until after the results. My emotions are mixed because I have to balance both joy and pain to the children I love so much and at whose behest and instance I tolerate all what I would ordinarily not tolerate. My emotions are mixed because some of my children did extremely well and others did not, because I have to give equal love to both those who succeeded and those who did not and because I must share both the celebration of success and pain of not succeeding.

As we celebrate those who have succeeded through this difficult journey, let us also show compassion for those who did not realise their dreams. I wish to say to them that success does not come easy. It is worth trying again and giving it our best. I

therefore urge all those who did not succeed to return to school and give it another shot.

The 2011 results show a complicated mix of interesting trends. Whilst as a province we did not succeed in realising a improvement overall, we have however realised areas of excellence. The results achieved by the top learners rank amongst the best in the country and we should all feel justly proud of their achievements. Such excellent results do not come easily and are always the consequence of long hours of study, sacrifice on the part of parents, grandparents and other guardians, the diligence of teachers and the determination to excel on the part of the candidates themselves. All these are necessary and integral parts of success and I commend this formula to you all. I should like to convey my congratulations to all our top achievers and to wish them every success in their future careers.

There are also results about which we should feel less than pleased. It is not acceptable to any of us that some schools continue, year after year, to produce results less than the national pass rate for grade 12. It is true that many of these schools experience considerable challenges as regards qualified teachers, lack of resources and errant learners who often do not seem to want to learn. In essence, it is often noticeable in poorly-performing schools that the formula for success which I commended to you earlier, is nowhere in evidence. Teachers do not teach, learners are not willing to learn and parents are uninvolved.

This, however, does not in any way excuse poor results. There are ample examples of similarly challenged schools still producing excellent results on a consistent basis. It is incumbent upon us all to ensure that this deplorable state of affairs ceases

forthwith and that we all intervene meaningfully to transform our schooling sector. You will notice I said the word “we”. This is because I believe that all who have the interests of education in this province at heart must join hands and work together. Schools are integral parts of our community and provide an important service to those communities. It is a necessity therefore that communities own schools, work with principals and teachers and motivate their children to provide them with the best possible future.

Once more, my heartiest congratulations and best wishes to all our learners, their parents and teachers and my special love to all those who did not make it.

ADV MODIDIMA MANNYA : HEAD: EDUCATION

EXAMINATIONS IN SOUTH AFRICA AND THE EASTERN CAPE

1.1 INTRODUCTION

The 2011 cohort of Grade 12 learners is the fourth group to write the National Senior Certificate examination, based on the National Curriculum Statement. As can be expected after four years, the teething problems experienced in the first few years have been resolved and there is a greater maturity of the system. Those learning and teaching in this system have become more accustomed to its demands and expectations and there are fewer surprises when the examination papers are turned over and the examination commences. Officials administering the examination have also become used to the various processes and to the new integrated examination

computer system. This is not to say, however, that there no challenges left. Much work remains to be done to produce a completely flawless examination. These challenges will be addressed later, but first it is necessary to explain exactly what the examination consists of and how it is managed.

1.2 GOVERNANCE

The National Senior Certificate and ABET Level 4 examinations are managed by the Department of Basic Education (DBE) and Department of Higher Education and Training (DHET) respectively. Provinces support, implement, administer, conduct and manage assessment and examination processes on behalf of DBE and DHET respectively.

The Director: Assessment and Examinations in the Province together with the Chief Director for Curriculum Management are members of the national Inter-Provincial Assessment and Examination Committee (IPEAC) which was established in 1996. IPEAC is a sub-committee of the Heads of Department Committee (HEDCOM), and comprises provincial heads of examinations from both public and private examination bodies. The other role-players are Higher Education South Africa (HESA), UMALUSI, South Africa Qualification Authority (SAQA), the Independent Examinations Board (IEB) and the Teacher Unions. IPEAC supports the Department of Basic Education and Provincial Education Departments in ensuring that the administration and management of public examination and assessment processes are implemented as per the national norms and standards set. The Provincial

Examination Directorate reports to the Provincial Examination Board.

Public examinations are conducted in accordance with the *Regulations Pertaining to the Conduct, Management and Administration of the National Senior Certificate* and for ABET Level 4 examinations in accordance with *Regulations Pertaining to the Conduct, Management and Administration of ABET Level 4*.

1.3 QUESTION PAPERS

All the NSC and ABET Level 4 question papers used in the examinations are set by the respective national Departments. The papers are set by panels of specially selected examiners, who are guided by the Subject Assessment Guidelines for each subject on what to set. It is important that all major aspects of the Learning Programme/Subject are covered and that there are questions set which will effectively differentiate between the different levels of abilities of the candidates. Precautions are taken to ensure that the setting of the individual questions and the subsequent question papers remain absolutely confidential.

Once finalised by the panel of examiners, the draft question papers are sent to the Internal Moderator for that subject, who then has to examine the paper/s carefully to ensure that there are no errors and that all questions are fair, are within the guidelines and will produce an adequate assessment of the expected ability of candidates. An important aspect of the process here is to make an assessment of whether the

language used in the questions is appropriate, given that the vast majority of candidates will write the examination in a language which is not their mother-tongue. Once the Internal Moderators have completed their tasks and any changes they may recommend are made, the question papers are sent to the Umalusi-appointed External Moderator for that subject, for final ratification. Any changes recommended at that level are made by the panel, and once the paper is finally approved, it is sent back to the DBE or DHET for storage, prior to distribution to Provinces for the next part of the process.

The process of developing an examination paper which meets all the criteria can be a lengthy one, so the process is begun at least eighteen months before the examination is actually written, to allow time for careful reflection and necessary changes to be made.

1.4 SCHOOL-BASED ASSESSMENT

In addition to the formal examination papers written at the end of the year, candidates are also expected to complete a variety of assessment tasks at school level. As in other grades, these requirements are spelt out in the Subject Assessment Guidelines (SAGs) for each subject and are meant to allow the candidates to work consistently throughout their Grade 12 year and to be rewarded by accumulating marks towards their final result. These assessment tasks cover a wide variety of activities but can include formal assessments like tests and school examinations, assignments and projects, etc. Less formal assessments such as class

work exercises can also be included. In addition, some of the more practical subjects also require a physical demonstration of the candidate's learning and so Practical Assessment Tasks (a formalised and standardised set of tasks, designed at national level) have to be undertaken by candidates offering practical subjects. Languages also have oral components to them which need to be assessed.

All of these components are put together in a formula provided in the Subject Assessment Guidelines to produce the candidate's School-based Assessment mark or SBA. This is a vital component of the candidate's final result and must receive continuous attention throughout the year in order to maximise the advantage to be gained by having a good SBA mark in the bank, so to speak, before the written examination begins at the end of the Grade 12 year. Having a good SBA mark will contribute considerably to a candidate doing well at the end of the year. Conversely, a candidate who does not work consistently throughout the year but expects to redeem his or her prospects in the final examination shall find it challenging to attain a good result. SBA tasks need to be taken seriously and completed fully and on time.

1.5 MODERATION

Given that schools and educators are not all at the same level of development, mechanisms have to be found to ensure a common standard across all schools when it comes to School-based Assessment. Even though it only counts 25% towards the candidate's final result, an over-inflated assessment or under-assessment can have a devastating

impact on the candidate's final result and on their subsequent life chances. There is no doubt that in the South African situation, the National Senior Certificate can be seen as a "high stakes" examination, where a great deal depends on the final result. It is therefore necessary to take all reasonable measures to ensure that the results across schools are of a comparable standard.

This is done by instituting a process of moderation, which sees the School-based assessments subjected to scrutiny at a school, district, provincial and national level, before also being scrutinised by UMALUSI (the national quality assurance body responsible for the National Senior Certificate and for ABET L4). Adjustments to marks may be made to bring the results of the SBA into line with District, Provincial and National standards. If such adjustments fail and there is still a major discrepancy between the performance of candidates from a particular school in the final written examination and in their School-based Assessments, a statistical adjustment is made to the results of all candidates in that school, using the final written examination as the norm. There is thus good reason why the final SBA result of candidates should not be divulged to candidates, as these marks are always subject to further moderation, which could be upwards or downwards. However, as the system matures and the standards set at a national level are better understood and internalised, the need for large scale adjustment of marks through moderation has diminished considerably.

1.6 MODERATION OF THE RESULTS OF THE WRITTEN EXAMINATION

Just as the School-based Assessments of candidates for individual subjects and Learning Areas are subject to scrutiny and moderation, so the results of the written examination are also subject to moderation. To avoid the prospect of being both referee and player, the moderation is not undertaken by the examining body (the DBE), but by UMALUSI. Once the results of the written examination are captured on the computer system, the results of the written examination in each subject are scrutinised by a specially-appointed panel of moderators at UMALUSI. These experts are not subject specialists, but highly-trained statisticians, who compare the statistical results (usually presented in graph form) of the current year's written examination with those of the previous three years.

This moderation is done to ensure fairness and to preserve standards. Despite all the checks and balances with regard to question papers described above, problems may still occur. For example, despite the best efforts of the examiners to produce a question paper which allows all candidates to adequately demonstrate their knowledge, it may be that far fewer of the top candidates (who could reasonably be expected to obtain distinctions) fail to do so, meaning that the paper failed to identify and reward excellent candidates in line with expectations. This is more noticeable when statistics are compared across subjects and are compared to the same subject results in previous years. The same may be said

when it is found that a question paper was too easy or too difficult for candidates, which may result in too many candidates obtaining distinctions, or too many candidates failing, when compared to previous years. Stability in the system adds to the overall credibility of results and thus statistical adjustments are made.

It must be emphasised that at no stage are the results of individual candidates looked at or compared, only the spread of the statistics across the various mark ranges. A round-table conference of the DBE and UMALUSI is held at which academic reasons for improvements or declines in performance are discussed and proposals made for adjustments. Such statistical moderation is a feature of all major examination systems across the world and should be seen as a necessary part of the process, and not a sinister manipulation of results.

1.7 WHAT ARE THE REQUIREMENTS FOR A NATIONAL SENIOR CERTIFICATE?

In order to obtain a National Senior Certificate the learner must:

- 1.7.1 offer seven approved subjects and provide full evidence of School Based Assessment for each subject.
- 1.7.2 complete the programme requirements for Grades 10, 11 and 12 separately and obtain distinct outcomes and associated standards for all the grades.

- 1.7.3 comply with internal assessment requirements for Grades 10, 11 and 12; and the external assessment requirements of Grade 12.
- 1.7.4 achieve at least 40% in three subjects, one of which must be an official language at Home Language level.
- 1.7.5 must achieve at least 30% in three other subjects.
- 1.7.6 provide full evidence of the SBA component in the subject failed.

| SUBJECT | LEVEL OF ACHIEVEMENT |
|---|-----------------------------|
| 1 Home Language | 40% |
| 1 Home or First Additional Language | 2x subject - 40% |
| Mathematics or Mathematical Literacy | 3x subject - 30% |
| Life Orientation | 1x subject less than 30% |
| 3x subjects selected from approved subject list | Evidence of SBA is provided |

1.8 RATING SCALE

A rating scale is used to summarise achievement. This is the same scale in use in Grades 10 and 11 and which will eventually be used throughout the schooling system when the new Curriculum and Assessment Policy Statements (CAPS) are fully implemented.

| ACHIEVEMENT LEVEL | ACHIEVEMENT DESCRIPTOR | MARKS % |
|-------------------|-------------------------|---------|
| 7 | Outstanding Achievement | 80-100 |
| 6 | Meritorious Achievement | 70-79 |
| 5 | Substantial Achievement | 60-69 |
| 4 | Adequate Achievement | 50-59 |
| 3 | Moderate Achievement | 40-49 |
| 2 | Elementary Achievement | 30-39 |
| 1 | Not Achieved | 0-29 |

1.9 MINIMUM ADMISSION REQUIREMENTS TO HIGHER EDUCATION

It must be emphasised that what follows are the minimum requirements set for admission to Higher Education Institutions (HEIs). HEIs are at liberty to raise these requirements at any time, depending on the number of applicants they receive. They are also at liberty to set their own entrance and placement tests and to set higher requirements for entrance into particular courses or fields of study. Some HEIs do not recognise particular subjects for selection processes into certain study areas. For example, Mathematical Literacy is not recognised in some HEIs for entrance into courses of study involving Engineering and Sciences. Candidates should consult the HEI of their choice to ascertain entrance requirements.

1.9.1 HIGHER CERTIFICATE (HC)

- NSC with minimum of 30% in the Language of Learning and Teaching (LOLT) of the Higher Education Institution as certified by UMALUSI.
- Institutional and programme needs may require additional combinations of recognized NSC subjects and levels of achievements.

1.9.2 DIPLOMA

- NSC with a minimum of 30% in LOLT
- Achievement rating of 3 (moderate achievement (40-49%) or better in four (4) recognized NSC 20- credit subjects.
- Institutional and programme needs may require additional combinations of recognized NSC subjects and levels of achievement.

1.9.3 BACHELOR'S DEGREE

- NSC with a minimum of 30% in LOLT.
- Achievement rating of 4 (adequate achievement, 50 - 59%) or better in four subjects chosen from the recognised 20-credit NSC subjects (which will be known as the designated subject list) below:

| | | |
|----------------------|---------------------------------|-----------------------|
| Accounting | Engineering Graphics and Design | Mathematics |
| Agricultural Science | Geography | Mathematical Literacy |
| Business Studies | History | Music |
| Consumer Studies | Information Technology | Physical Science |
| Dramatic Arts | Languages | Religion Studies |
| Economics | Life Sciences | Visual Arts |

1.10 ADMINISTRATION IS THE RESPONSIBILITY OF THE PROVINCES

The Provincial Departments of Education (PEDs) have responsibility for the printing, packing and distribution of examination question papers. They also oversee all other aspects of the examination process, beginning with the registration of candidates, the writing of the examinations and marking. Marking processes are the primary responsibility of Provinces, while the DBE facilitates the standardisation of marking guidelines. Markers are appointed and trained by PEDs. The release of the results resides with the Minister of Basic Education, in conjunction with Members of the Executive Council for Education in each province.

2.1 INTRODUCTION TO EXAMINATIONS AND ASSESSMENT IN THE EASTERN CAPE

In the Eastern Cape, the NSC and ABET Level 4 examinations are administered by the Head Office Directorate: Assessment and Examinations and co-ordinated through the Inter-District Assessment and Examination Committee (IDAEC) which was established in 2000. This body plays a key role in assisting and monitoring the conduct of assessment processes in the 23 districts of this Province and has contributed, in no small part, to the successes attained by the Eastern Cape Department of Education in providing a consistently credible and efficient examination and assessment service to its schools and centres. Indeed, Examinations and Assessment has long been regarded as one of the flagship programmes within the Department. This status is almost entirely due to the small team of dedicated officials at both Provincial and District level who labour behind the scenes, often without recognition, to ensure that the learners throughout the system receive the results they have earned.

2.2 THE 2011 NATIONAL SENIOR CERTIFICATE EXAMINATIONS

The year 2011 was a significant year for the Province of the Eastern Cape. The 7,3% increase in the overall pass rate in 2010 brought excitement and raised hopes for further improvement.

This year has also seen increased emphasis being placed on devising strategies that could further improve the quality of teaching and learning. This has been the main focus of the Department of Education. However, it is worth noting that the Eastern Cape Province continues to be plagued by a lack of resources such as teacher and learner support material and a shortage of skills. Amongst the intervention strategies devised is the “Learner Attainment Improvement Strategy” (LAIS) which addresses various learning and teaching issues and “Action Plan 2014” which is long range plan to respond to challenges cited earlier.

The context in which these strategies had to be implemented is discussed under the *Profile of the Province* extracted from ‘Province of the Eastern Cape: Evidence based Report on Grade 12 Intervention Strategies” developed by the Chief Directorate: Curriculum Management.

2.4 DISTINGUISHING CHARACTERISTICS OF THE PROVINCE

2.4.1 Geographical and political characteristics

The Province of the Eastern Cape is mainly rural with high levels of poverty and unemployment. It is located on the south eastern seaboard of the country and covers an area of 170 600 km². This is 14% of the country’s landmass. The administrative capital, Bhisho, is located 65km from East London, one of the two ports in the Province. The other is Port Elizabeth. The Province is relatively centrally situated and is linked to the major market centres of South Africa by a modern network of air, roads and railways. However, the

condition of many roads outside of the main centres is relatively poor.

The Department of Education continues to face numerous challenges primarily owing to historical, integration and budgetary factors. The integration of different former homeland administrations currently constituting the Eastern Cape Provincial Department of Education meant a complicated change process. This appears to have been one of the major contributing factors to operational instability of the Department. Poor management of certain key deliverables and a poor work ethic in certain sections of the administration has contributed to the non-performance of the Department. In addition, the disruptions at the beginning of the 2011 academic year in terms of the non-delivery of stationery, the shortcomings of the scholar transport system and the challenges surrounding temporary teachers have provided systemic challenges. The Provincial 12 Point Plan was developed to reverse the impact of these challenges.

It further appears that the different organisational cultures have not been integrated into one. The various homeland departments had different approaches to issues. This accounts mainly for the levels and state of development of the various sections of the province. It is common cause that certain parts of the Province are less developed than others, posing major service delivery challenges. This, it appears, is compounded by the challenges arising from the lack of integrated development planning and the higher costs of

delivery in those areas. In particular, this has affected education in the following areas:

- a) The greater portion of the province is rural and underdeveloped making it unattractive for skilled educators to work in those areas. This has had a direct impact on the process of the redeployment of educators.
- b) Rightly or wrongly, the decision not to process the post provisioning and implement the process fully has translated in the current cost pressures on the budget. This is now one of the major issues having a direct impact on both the budget and the delivery of education outcomes.
- c) The planning and reporting processes of the Department over a period of time appear to have not been correct. The plans and reports of the Auditor General over a period of time suggest that the plans and reports of the Department have not been credible.

The Head Office of the ECDoE is situated in Zwelitsha, some 10km from Bhisho. The ECDE is organised into 23 education districts.

These 23 education districts are presently being realigned to the municipal boundaries of the province to ensure that the department fulfils its mandate.

The Department has also commenced with an Organisational Development intervention in 10 prioritised

districts (Cradock, Graaff Reinet, Cofimvaba, Queenstown, Fort Beaufort, Libode, Bizana, Lusikisiki, Port Elizabeth and East London) on the various departmental Turnaround Plan issues, including the six priorities of the Section 100 intervention to address key challenges being experienced at district level.

2.4.2 SOCIO-ECONOMIC PARTNERS OF THE PROVINCE

The socio-economic partners are mainly government departments, organized labour, organized business and key industries in the Buffalo City Metropolitan Municipality and in Nelson Mandela Metropolitan Municipality and SMME businesses. The ex-Transkei area and partly ex-Ciskei are rural and the infrastructure ranges from bad to non-existent. The Province has four Higher Education Institutions which draw from the successful Grade 12 learners of the Department of Education achieving a NSC certificate with a bachelor's endorsement, namely Rhodes University, Walter Sisulu University, Fort Hare University and Nelson Mandela Metropolitan University (NMMU).

2.4.3 UNIQUE DISPARITIES

Communities within the Province display completely varying cultural tendencies, values and attitudes towards education service delivery. The Province has a wide range of schools ranging from 43 special schools, 41 ex-model C urban schools to peri-urban township schools and rural schools. In total there are 906 senior secondary schools within the Province offering Grade 12. Rural and farm schools in

particular pose unique educational challenges in terms of multi-grade teaching. Within the Province there are still schools which practice subliminal discrimination in the form of admission entrance tests focussing on language as a medium of instruction. Infrastructure development has been slow and this has not provided an enabling environment to historically disadvantaged communities in terms of housing, telecommunications, roads, education and economic development. Rural schools are still disadvantaged in terms of access to basic resources such as electricity, water and sanitation. .

The Grade 12 class of 2011 has been subject to systemic challenges, particularly those learners who attend historically disadvantaged schools. The ineffectiveness of SGBs in many of these schools has contributed to the poor management of the schools. Resourcing at many previously disadvantaged schools has not promoted optimal teaching and learning. Lack of specialist rooms (laboratories and libraries in particular), have contributed to serious gaps in content knowledge and the application of practical skills in specialised subjects.

The disproportionate number of District Advisors to senior secondary schools has also meant that support to under-performing schools has been seriously compromised. What worsens the situation is the quality of many advisors who were absorbed into the department following the closure of teacher colleges. However, the Province is engaging in an

Organogram review process to address these disparities and other organisational challenges.

In addition to systemic challenges, the Class of 2011 has faced multiple psycho-social challenges. 2011 has seen an upsurge in drug abuse and teenage pregnancies. Statistics within the Department indicate that whilst teenage suicide has declined, the need for integrated programmes addressing social and moral issues remains high for all categories of schools and learners. There is inadequate psycho-social support to learners.

Even though 2011 has been the year of the maxim “teacher, textbook and time”, and the grade 12 class of 2011 has been part of this vision, schools still have under-spent on the provisioning of textbooks to learners. Of the R307 million devolved to Section 21 schools, only R107 million has been spent in this regard. Therefore, the Department embarked on major changes to address these issues through its Turnaround Strategy.

2.4.4 CHARACTERISTICS OF THE 2011 NSC GRADE 12 LEARNERS

The class of 2011 NSC Grade 12 learners is still subject to historical challenges, the impact of high levels of poverty and unemployment , the huge distinction between the urban and rural divide, and deep rooted educational limitations such as lack of education infrastructure, specialist rooms etc.

In addition, psycho-social factors have impeded academic performance. Parental involvement in some districts is minimal for most rural families due to illiteracy and absence of parents in most cases. Some of the learners are heading families. Most of learners had to walk long distances to and from school, whilst a few benefitted from the scholar transport service. This has been vigorously addressed through the Turnaround Strategy of the Department and the management of scholar transport. A good number of learners only depend on school nutrition programme and have nothing to eat at home. The foundational knowledge of these learners is seen as not solidly laid in respect of their reading, writing and numeracy skills in the lower grades. Learners might not have all the supporting structures necessary, be it emotionally, financially or educationally.

2.5 NUMBER OF CANDIDATES AND EXAMINATION CENTRES IN 2011

The figures in Table 1.1 and Table 1.2 below provide a comparison of the number of candidates who have entered for the National Senior Certificate and ABET L4 examinations in the Province this year and last year. It is worth noting that the Eastern Cape has the fourth largest number of candidates for the NSC after KwaZulu/Natal, Limpopo and Gauteng provinces.

TABLE 1.1
**NUMBER OF CANDIDATES ENROLLED FOR NSC 2010
 and 2011**

| Year | Number Full-time | Number Part-time | Total | Increase / Decrease |
|------|------------------|------------------|--------|---------------------|
| 2010 | 68,126 | 11,311 | 79,437 | 4,539 |
| 2011 | 68,082 | 15,894 | 83,976 | |

The number of candidates has therefore increased when compared to 2010.

TABLE 1.2
NUMBER OF EXAMINATION CENTRES 2010 AND 2011

| Year | Number of Centres | Increase / Decrease |
|------|-------------------|---------------------|
| 2010 | 907 | 11 |
| 2011 | 918 | |

It remains a challenge to effectively monitor the examination centres set up in independent and private examination centres. Despite a rigorous registration and training process, there are still institutions which either register too many candidates for their administrative systems to handle, or which fail to honour the terms of the contract they enter into with the Provincial Department of Education and their clients.

Such defaulting centres often de-register or fail to properly register candidates. Such centres actually fail to provide an efficient and effective examinations and assessment service to their clients (the learners and the parents / guardians) and create unnecessary and unpleasant publicity for the Department. Conducting public examinations at Independent schools or examination centres is not an automatic right and the Department has embarked on a rigorous review of the annual registrations of all such examination centres to stamp out malpractices and to ensure that all learners have proper access to credible and efficient examination and assessment services.

2.6 MONITORING VISITS BY THE DEPARTMENT OF BASIC EDUCATION AND UMALUSI

Each year the DBE conducts several visits to the Provinces in the course of the year. On occasion, the officials from the DBE are joined by representatives from UMALUSI. The visits are primarily for monitoring purposes but are also used to highlight areas of good practice and to share information between officials in different provinces. In the case of the Eastern Cape Department of Education, amongst other things, the way in which the Directorate of Examinations and Assessment manages and controls scripts has been held up as an example of good practice for all provinces to emulate. It is possible for the section to retrieve scripts quickly and efficiently, due to the unique system used and the transparent bins in which they are stored.

2.7 OTHER INNOVATIONS

There are a number of other innovations which the Department has put into place which also greatly facilitate the smooth running of examinations and assessment processes, especially in the NSC. One of these is to painstakingly review every grade 11 promotion schedule to ensure that only those learners who have met the gazetted promotion requirements are in fact promoted to Grade 12 and to ensure that there is no gate-keeping by Principals. (Some principals like to retain weaker learners despite the fact that they have met the requirements in Grade 11, in order to boost their school's pass rate in The NSC examination. Once reviewed and any anomalies explained or investigated, the Grade 11 promotion schedules become the first registration for the NSC examination. This ensures that only those candidates who have earned the right to be promoted to Grade 12 are actually registered for the NSC examination.

2.8 CHALLENGES

Despite many areas of excellence and a constant improvement in systems and processes through examinations and assessment in the Eastern Cape, there are a number of areas of serious challenge which bear mentioning.

2.8.1 IRREGULARITIES

Unfortunately the instances of irregularity in examination and assessment processes remain at an unacceptably high level. Given the high-stakes nature of public examinations, it is not unexpected that some candidates (and sadly their educators) make themselves guilty of dishonesty. It is unacceptable, however, that there are still a worrying number of instances of cribbing and copying during examinations, possibly due to poor invigilation. If proper invigilation was done, candidates engaged in dishonest practices should be caught unless there is collusion between invigilator and candidates. The Department has a zero-tolerance policy for dishonesty and all those candidates (and educators) who make themselves guilty of this malpractice will have to face severe consequences.

2.8.2 POLICIES NOT ADHERED TO

Policies are only as good as the paper they are written on if they are not adhered to. If, for example, unauthorised persons are allowed free access into restricted areas, then the policy on security of examination materials becomes unenforceable and ignored, which could lead to a major breakdown. Similarly, if staff members charged with implementing policy either chose to ignore policy or do not know the policy, their actions become subject to judicial review, which may be both unnecessary and wasteful. Implementation of policy must remain a priority for all staff members. Staff training and re-training on policy requirements is a necessity which has been recognised.

2.8.3 NON-PROVISION OF LEARNER AND EDUCATOR EVIDENCE TO BACK UP SBA MARKS

All educators and candidates are required to keep complete records of all assessments that take place. This does not mean that bulky folders are required to be kept, but during moderation it is a requirement that tangible evidence of learner performance can be produced to substantiate the grades awarded to candidates. It is often the case that when evidence of performance is required schools, educators and candidates are unable to produce it. This leads to an undermining of the credibility of the School-based Assessment mark and to suspicions that educators have not completed learning programmes and that the marks provided are mere guess work. This can have severe consequences for all candidates in the Province as UMALUSI is quite entitled to refuse to certify results as credible and allow them to be released if there is sufficient concern that they may be bogus. Fortunately, this challenge is not widespread in this Province, but remains an area which requires constant attention to ensure that requirements are met.

3. CONCLUSION

The purpose of the Examinations and Assessment Directorate is to deliver a credible, effective and efficient examination and assessment service to its users. This, despite the many challenges the Directorate faces, it has managed to continue to provide in 2011 and will no doubt, continue to provide in the years to come. Our commitment to

service delivery and to service excellence remains unwavering.

Working together we can achieve more
