ANNUAL NATIONAL ASSESSMENT (ANA)

INTRODUCTION

The Annual National Assessment (ANA) is a critical measure for monitoring progress in learner achievement as outlined in the Education Sector Plan: Action Plan to 2014: Towards the Realisation of Schooling 2015. As a monitoring tool ANA is in the third year of implementation and as a result there is much that needs to be done in terms of strengthening the reliability and validity of the data emanating from the ANA. ANA is a testing programme that requires all schools in the country to conduct the same grade-specific Language and Mathematics tests for Grades 1 to 6 and Grade 9. The ANA was written by almost 7 million learners from 24 000 schools on 10 – 13 September 2013 across all 9 provinces.

ANA has provided the Department of Basic Education with a better understanding of the impact we are making as a system towards our targeted interventions in improving Mathematics and Language levels of learners outlined in the Education Sector Plan: Action Plan to 2014. Through ANA we are able to establish critical information on learner performance in Grades 1 to 6 and Grade 9 in public schools, including special schools and state funded independent primary schools in South Africa.

Through annual assessment programme the department remain committed to improve the quality of basic education, with particular focus on the critical and non-negotiable outputs and activities. The key outputs are to ensure high quality of teaching and learning, improved language and Mathematics at schools, better National Senior Certificate examination performance as well as expanding early childhood development.

THE POLICY CONTEXT

The key thrust and long-term focus of the Education Sector Plan, hereafter referred to as the *Action Plan*, is to improve the quality of basic education. The *Action Plan* is an expression of the Education Sector's conviction that a high-level statement of long-term strategy helps to guide planners in various institutions, such as PEDs, companies running partnerships with Government, teacher unions and relevant faculties of education at universities. The document outlines clear and measurable outcomes that the Education Sector has identified within the priorities of Government.

In particular, the improvement of the quality of basic education has been identified as the top priority of Government on which the DBE has to deliver. In this regard the Minister of Basic Education signed a Delivery Agreement with the President of the Republic of South Africa to meet the obligation of establishing basic education of a high quality.

Within this context, ANA is a critical measure for monitoring progress in achieving set targets in terms of learner achievement.

The *Action Plan* specifies that ANA is a testing programme that requires all schools in the country to participate in the same grade-specific Language and Mathematics tests for Grades 1 to 6 and Grade 9. The specific purposes of ANA include:

EXPOSING TEACHERS TO BEST PRACTICES IN ASSESSMENT

Where the Provincial department has implemented province-wide standardised assessments, this has been found to change teacher practices for the better. What ANA does is this: it exposes all teachers across the country to what national experts consider best practice in assessments. This will give all teachers a clearer idea of how to proceed when they develop their own assessments at critical points in the school year.

TARGETING INTERVENTIONS TO THE SCHOOLS

With ANA, districts have a standard source of information to determine which schools are most urgently in need of support. Information from ANA will be used to direct teachers towards particular kinds of teacher development programmes and to engage seriously with school principals on the specific subject-based challenges confronting his/her school.

GIVING SCHOOLS THE OPPORTUNITY TO PRIDE THEMSELVES IN THEIR OWN IMPROVEMENT

ANA makes it possible for primary schools to do what secondary schools have been able to do for many years, with the Grade 12 results. The Grade 12 results are used as a common yardstick to measure improvement over the years. This will allow schools to take pride in knowing that the efforts to improve the teaching and learning in the school is producing the desired outcomes.

GIVING PARENTS BETTER INFORMATION ON THE EDUCATION OF THEIR CHILDREN

Parents have a right to know how well the schools to which they send their children perform. If the results in the school are below what they should be, then ANA provides a good basis for parents to ask the school questions about what is wrong and to become involved in putting together a plan for the school that will improve the situation.

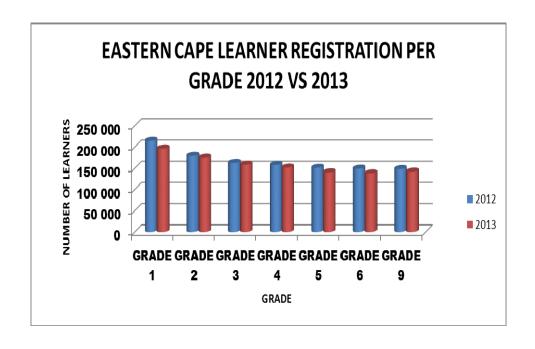

NATIONAL STATISTICS

REGISTRATIONS OF LEARNERS

SA-SAMS, CEMIS, and fresh capture were used to obtain the learner information. Registration data was eventually uploaded on the GET Mainframe system. Preliminary Registration Schedules were sent to schools for verification. Provincial Education Departments captured the corrections on the registration.

The total number of learners registered for ANA in 2013 was 6 997 602 compared to 7 229 006 in 2012. The number of learners in Grade 1 was the largest: 1 190 280 in 2013. A total of 48% of registered learners were female and 52% were male learners. There were 23 662 public schools and 793 independent schools that registered learners for ANA 2013.

NATIONAL	2 045	20 111

TEST DEVELOPMENT

Panels of teachers and subject specialists developed the tests for Language and Mathematics. Quality assurance processes included: review of tests by a panel of moderators, a pilot study and review of tests by external experts (Advisory Committee). Tests were adapted for learners with barriers to learning which included the blind and deaf. Tests were printed, packed and distributed to schools from a central location.

TEST ADMINISTRATION

Testing took place on 10-13 September 2013, based on a common time-table. 92 sets of tests were administered on approximately 7 million learners in Grades 1-6 & 9 in public and independent schools. Testing was managed by SMTs, monitored by districts, provinces and the DBE. In a sample of more than 2 000 schools an independent agent, monitored the writing of tests. Writing of tests in participating independent schools was managed by district officials. Reports indicated a successful testing process.

MARKING & MODERATION

DBE hosted a national marking guideline discussion for Grades, 3, 6 and 9, where all alternative responses were considered. Teachers marked the at school level under the supervision of the SMT, using the common national marking guideline. Re-marking of a sample of scripts was done for Grades 3, 6 & 9 at the provincial level to verify marking done by teachers. Re-marking conducted at 24 centres across the country. Re-marks correlated well with teacher marks (correlation between 0,89 and 0,96).

SUBJECT	GRADE	CORRELATION
MATHEMATICS	3	0.93
LANGUAGE	3	0.93
MATHEMATICS	6	0.93
HOME LANGUAGE	6	0.92
FIRST ADDITIONAL LANGUAGE	6	0.89
MATHEMATICS	9	0.96
HOME LANGUAGE	9	0.91
FIRST ADDITIONAL LANGUAGE	9	0.90

The correlation between the two sets of marks was in most cases higher than 0.9, which is an indication that marking at school level was fairly consistent and in line with the approved memoranda.

MARKS CAPTURED PER PROVINCE

Province	Expected	Maths	Language
EC	1 104 468	723,440	714,506
FS	407 962	320,540	323,151
GT	1 123 695	967,251	982,499
KZ	1 544 484	1,234,718	1,236,213
LP	952 472	690,630	688,050
MP	586 339	466,674	470,597
NC	178 629	138,121	137,971
NW	490 052	407,109	409,165
WC	609 501	574,300	576,223
National	6 997 602	5,522,783	5,538,375

The percentage of marks captured based on the expected learner records across grades ranged from 60% to 96%. The marks not captured can be attributed to learners, who were absent, mark sheets not collected from schools and therefore not captured, or there were missing mark sheets. The overall national mark capture of 80% of learners registered is acceptable, but must be improved in future years.

Percentage of marks captured per Grade

PROVINCE	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5	GRADE 6	GRADE 9	TOTAL

WC 282	95	96	94	96	96	94	89	94
NATIONAL	76	80	82	80	81	84	76	80

The percentage of marks captured based on the expected learner records across grades ranged from 60% to 96%. The marks not captured can be attributed to learners, who were absent, mark sheets not collected from schools and therefore not captured, or there were missing mark sheets. The overall national mark capture of 80% of learners registered is acceptable, but must be improved in future years.

ANA VERIFICATION

For a sample of approximately 125 schools per province an independent agent:-

- Monitored testing administration.
- Marked the test independently.
- Captured and processed the marks
- Reported the results

Verified results per province agreed closely with marks received directly from schools.

CREDIBILITY MEASURES - ANA 2013

For Grades 3, 6 and 9, random samples of scripts from each school were remarked (moderated) by appointed specialist teachers. ANA administration was monitored at more than 2000 schools by independent field workers. These tests were independently marked and processed. Verification results in terms of mean scores are not significantly different from mean scores of learners from the whole population.

LIMITATIONS OF ANA 2013

ANA is an evolving system and therefore there is much to be done in improving its reliability and validity. ANA attempts to address two significantly different purposes and, therefore, this may limit the extent and comprehensiveness to which each purpose is fully served. Test items were exposed and therefore different test items were designed in each of these three years. ANA was administered in the third quarter and therefore it was based on selected coverage of the curriculum.

Targets of percentage of learners for 2011-2014

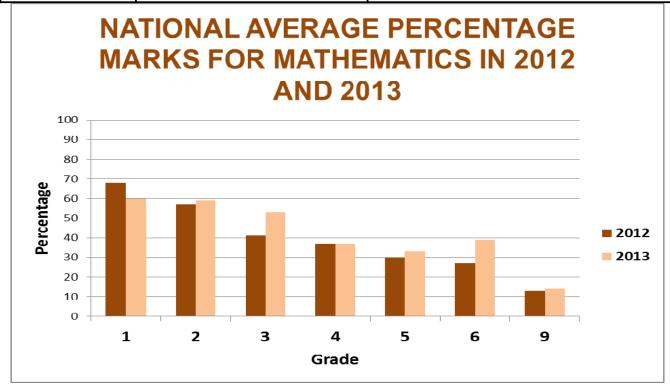

GRADE		LAN	GUAGE			MATHE	MATICS	
	2011	2012	2013	2014	2011	2012	2013	2014
3	53	55	58	60	53	55	58	m 60
6	46	51	55	60	35	44	52	60

The overarching goal, as per the injunction of the President of the Republic of South Africa in the State of the Nation Address in 2010, is that by 2014, at least 60% of learners in Grade 3, 6 and 9 should achieve acceptable levels of competency in Mathematics and Language.

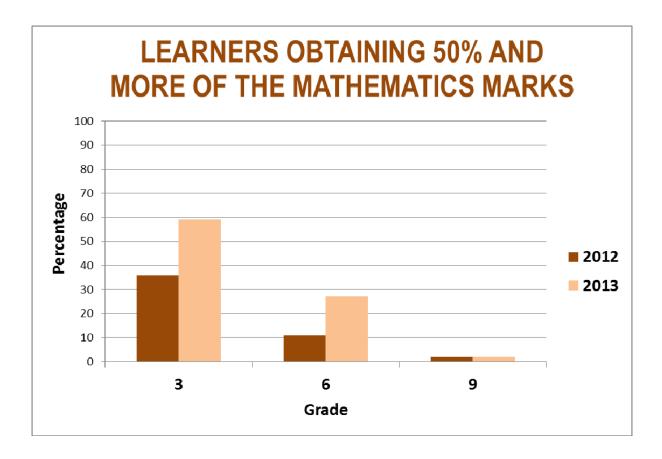

NATIONAL RESULTS

MATHEMATICS – NATIONAL RESULTS

GRADE	AVERAGE PERCENTAGE MARK - MATHEMATICS			
	2012	2013		
1	68	60		
2	57	59		
3	41	53		
4	37	37		
5	30	33		
6	27	39		
9	13	14		

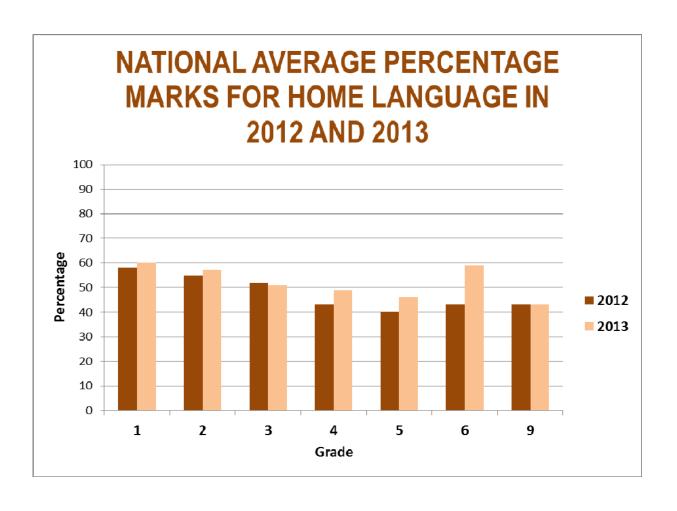

In most grades, the average performance of learners in Mathematics remained similar to the previous year. Performance increased considerably in Grades 3 and 6. Only in Grade 1 a slight decrease in achievement was observed.

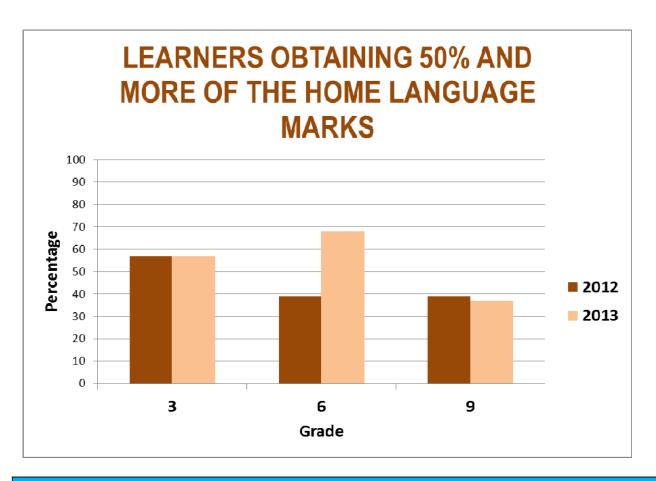

HOME LANGUAGE – NATIONAL RESULTS

GRADE	AVERAGE PERCENTAGE MARK – HOME LANGUAGE					
	2012	2013				
1	58	60				
2	55	57				
3	52	51				
4	43	49				
5	40	46				
6	43	59				
9	43	43				

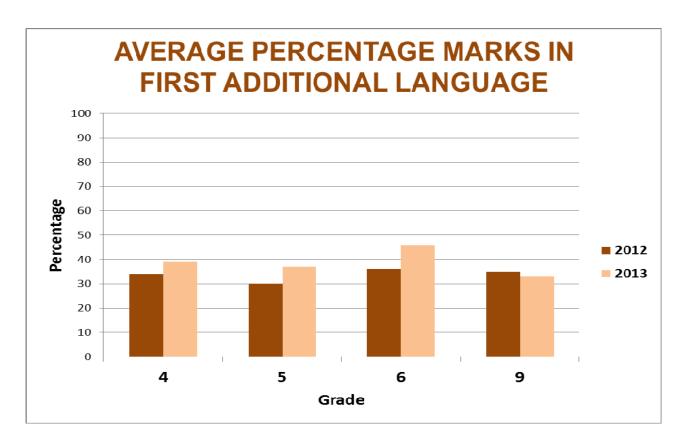

Home Language marks did not vary much across years, except for Grade 6 in which a large increase was observed from 43% to 59% in 2013.

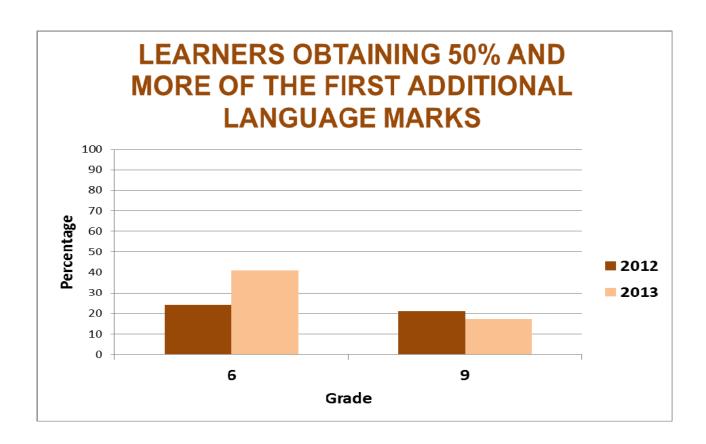

FIRST ADDITIONAL LANGUAGE - NATIONAL RESULTS

	AVERAGE PERCENTAGE MARK – FIRST ADDITIONAL LANGUAGE					
	2012	2013				
4	34	39				
5	30	37				
6	36	46				
9	35	33				

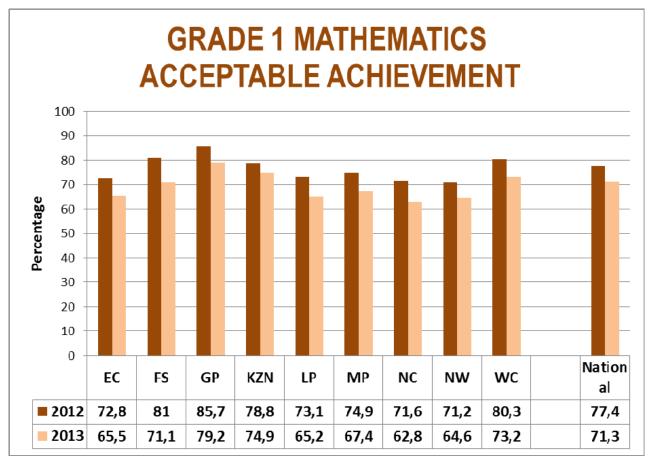

In Grades 4 and 9 the marks did not vary much across years, but considerable increases were observed in Grades 5 and 6.

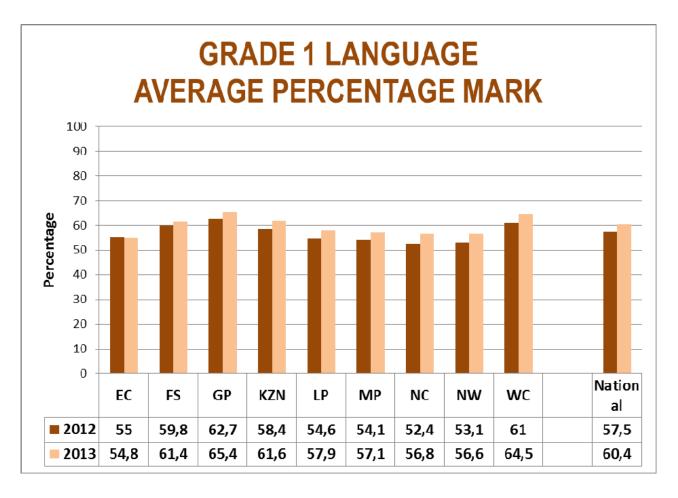

PROVINCIAL RESULTS

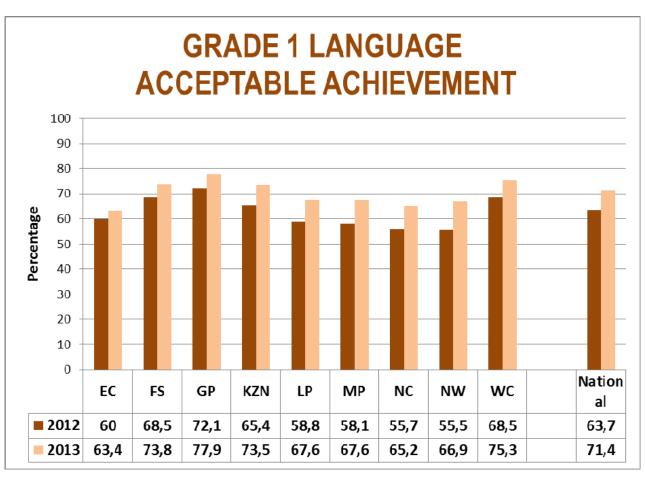

The percentage of learners attaining acceptable achievement levels was high in all provinces, with Gauteng being the highest at 79.2%.

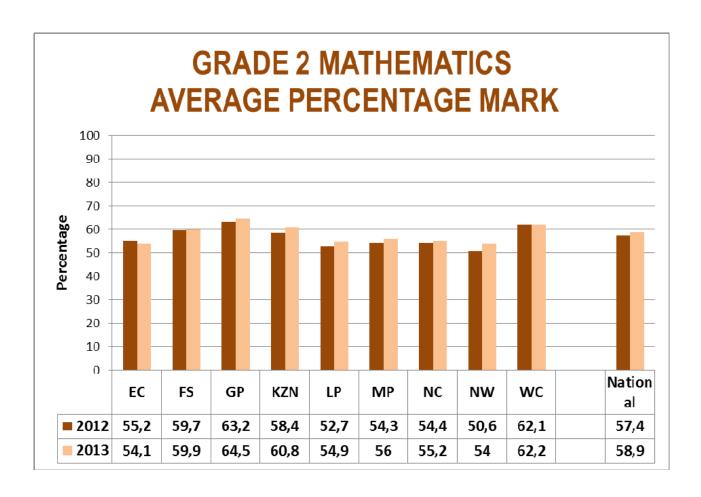

PROVINCIAL ACHIEVEMENT IN GRADE 1 MATHEMATICS IN 2013

KEY	
	Improved
	Remain the same
	Decreased

Even though the position decreased in most of the grades the average % marks improved.

ANALYSIS BY SEVEN LEVELS OF ACHIEVEMENT

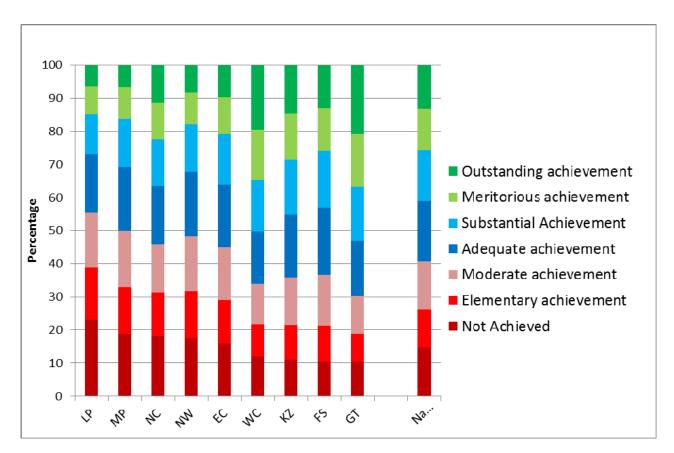

Learner achievement was expressed in terms of the seven levels of achievement specified in the CAPS document for the end of phase in Grades, 3, 6 and 9. In this section the results for each grade and subject are presented in distribution tables and graphs. The levels and descriptors are shown in the table below:

RATING CODE	PERCENTAGE	DESCRIPTOR
Level 1	0-29	Not Achieved
Level 2	30-39	Elementary Achievement
Level 3	40-49	Moderate Achievement
Level 4	50-59	Adequate Achievement
Level 5	60-69	Substantial Achievement
Level 6	70-79	Meritorious Achievement
Level 7	80-100	Outstanding Achievement

In the analysis that follows, high achievement of learners was considered to include levels 5 to 7. The graphs show the provincial distributions from the lowest (on the left) to the highest (on the right).

PERCENTAGE OF GRADE 3 LEARNERS IN ACHIEVEMENT LEVELS IN MATHEMATICS

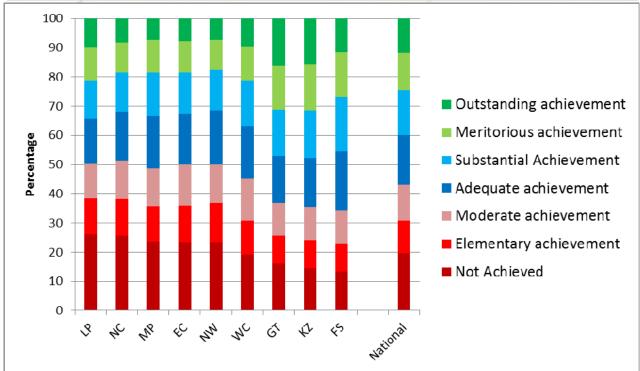

PROVINCE	L1	L2	L3	L4	L5	L6	L7
EC	16.1	12.9	16.1	18.7	15.4	11.2	9.6

About 45% of the learners functioned at the Not Achieved level in Grade 9 First Additional Language. Only about 7% of the learners functioned at high achievement levels.

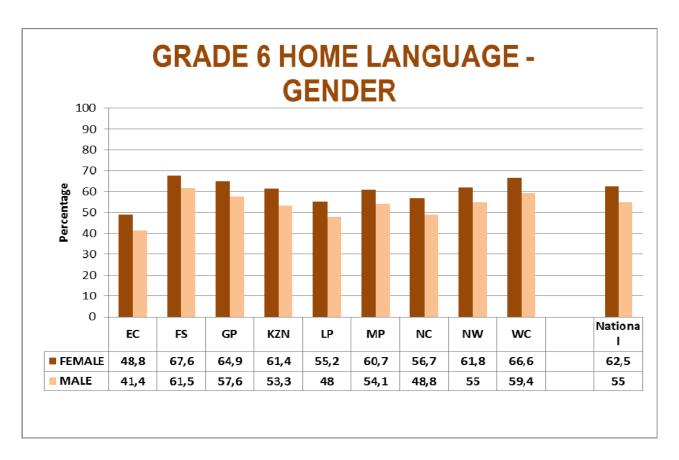

ANALYSIS OF ACHIEVEMENT BY GENDER

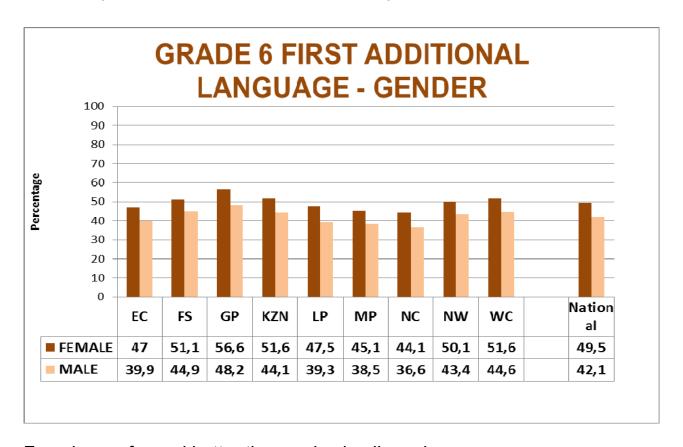

The average percentage marks obtained by males and females are depicted in the graphs below for Grades 3, 6 and 9 per subject

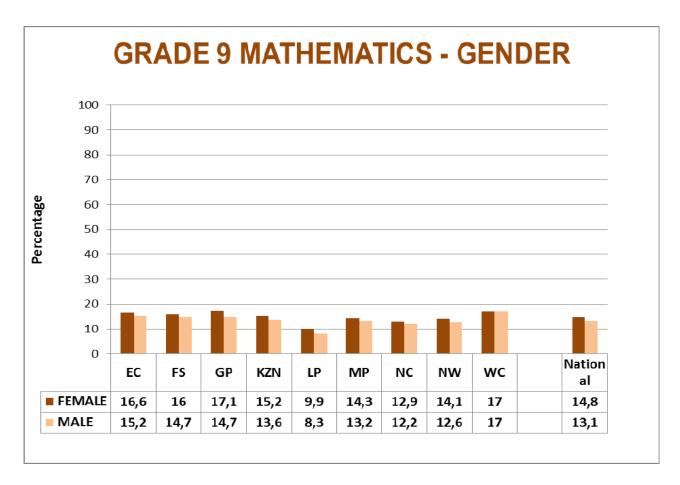

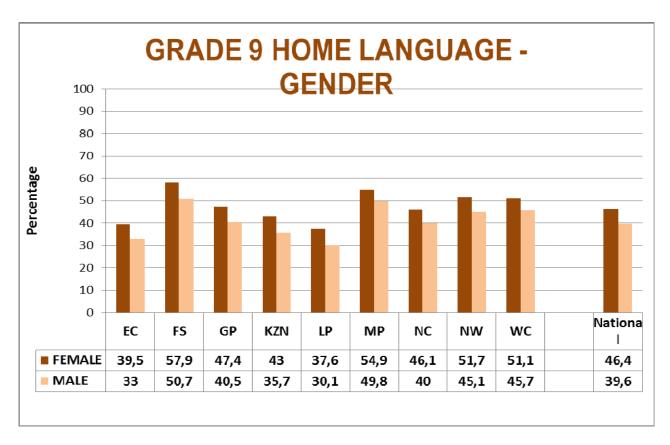

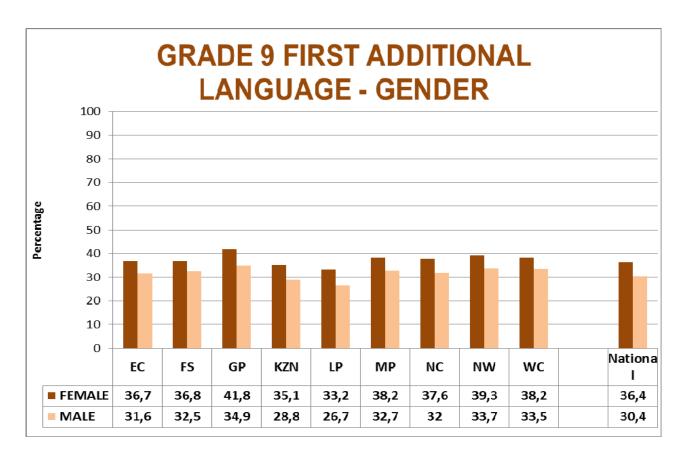

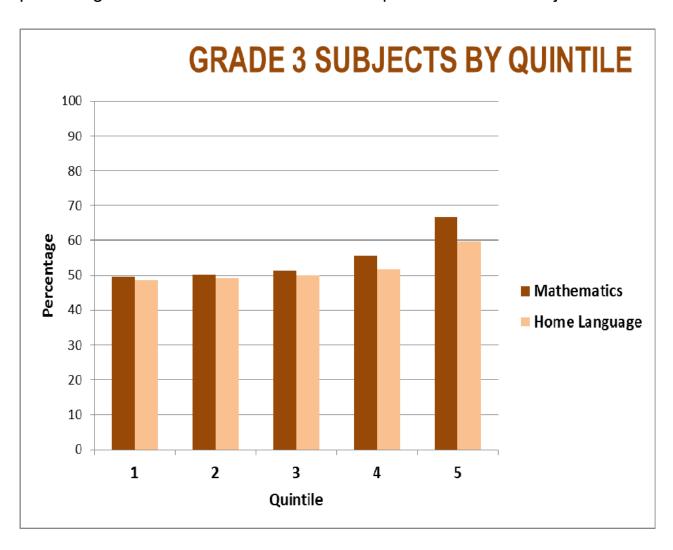

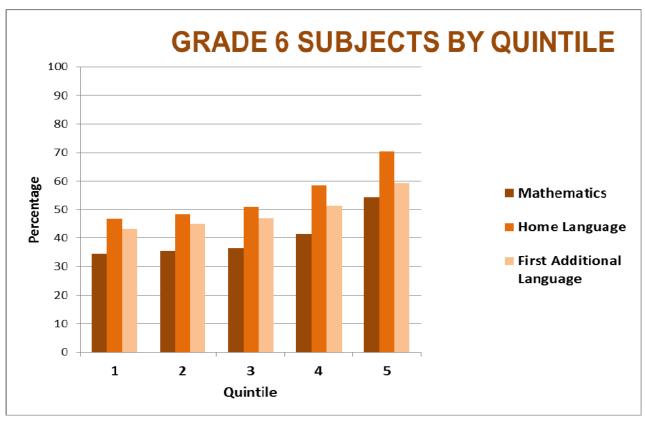

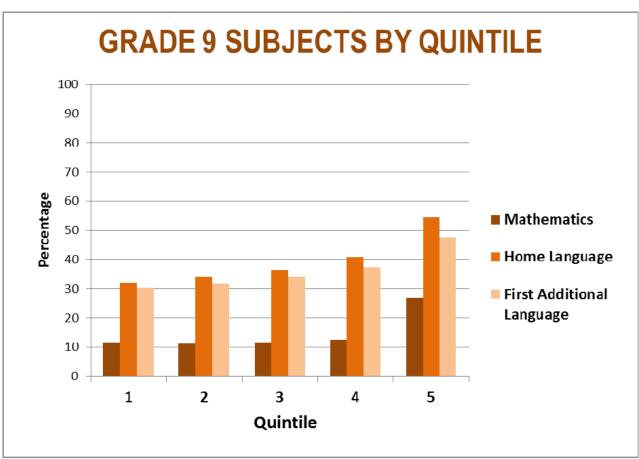

ANALYSIS BY OFFICIAL SCHOOL POVERTY QUINTILE

Schools are categorised according to a poverty index, referred to as a quintile, where a quintile of 1 would indicate 'poverty', and a quintile of 5 would indicate 'affluence' in the parent community. **Graphs** below show how the average percentage mark of learners varies across quintiles for each subject.

In all grades and subjects there is a tendency for learners in higher quintile schools to achieve better than learners in lower quintile schools. The increase is more pronounced from quintile 4 up. The socio-economic gradient appears to be steeper in Grades 6 and 9 than in Grade 3.

ANALYSIS OF LANGUAGE PERFORMANCE IN THE LANGUAGE OF LEARNING AND TEACHING

The tables and figures below represent the achievement of learners in the Language of Learning and Teaching (LOLT).

HOME LANGUAGE	GRADE 1	GRADE 2	GRADE 3
AFRIKAANS	67.6	64.9	54.5
ENGLISH	67.4	61.2	53.0
ISINDEBELE	52.4	52.6	43.1
ISIXHOSA	54.0	51.7	46.4
ISIZULU	59.1	56.9	54.3
SEPEDI	56.2	50.2	44.7
SETSWANA	59.5	54.2	52.9
SISWATI	54.5	49.4	45.0
SESOTHO	61.0	58.2	48.9
TSHIVENDA	62.4	57.0	54.3
XITSONGA	57.3	55.6	50.0

There is a slight variation in achievement across the grades.

Average % marks in Home Language by grade and LOLT (Grades 4-6 & 9)

GRADE	AFRIKAANS	ENGLISH
4	52.6	47.1
5	51.7	41.6
6	60.6	58.1
9	48.9	41.2

Average % marks in First Additional Language by grade LOLT (Grades 4-6 & 9)

GRADE	AFRIKAANS	ENGLISH	
4	58.0	39.2	
5	43.8	36.4	
branch of B	D 255.12 92	45.6	
9	48.2	33.2	

In Grades 4–6 and 9 learners with Afrikaans as LOLT performed slightly better than learners with English as LOLT

PERFORMANCE BY DISTRICT

In the following tables' average percentage in Grades 3, 6 and 9 Mathematics and Language are presented by number of district.

DISTRICT ACHIEVEMENT – GRADE 3

Average % in district	Mathematics	HL
Higher than 60%	7	0
Between 40 and 60%	73	77
Lower than 40%	1	4

DISTRICT ACHIEVEMENT – GRADE 6

Average % in district	Mathematics	HL	FAL
Higher than 60%	0	30	1
Between 40 and 60%	37	46	69
Lower than 40%	44	5	11

DISTRICT ACHIEVEMENT – GRADE 9

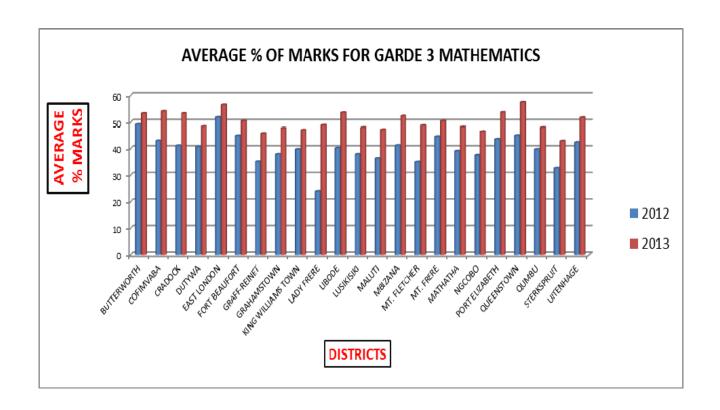

Average % in district	Mathematics	HL	FAL
Higher than 60%	0	2	0
Between 40 and 60%	0	46	6
Lower than 40%	81	33	75

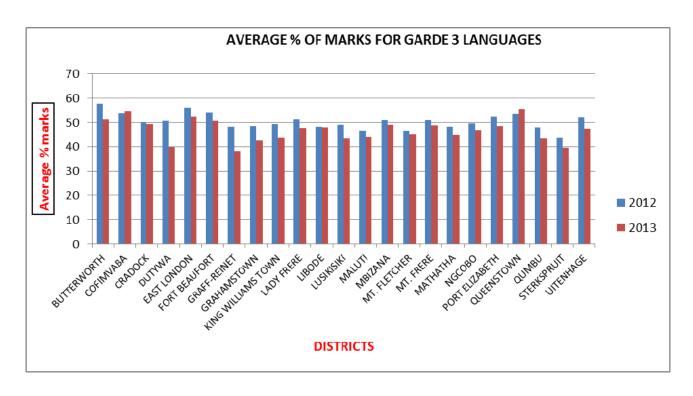

In the following tables average percentage marks for Grades 3, 6 and 9 Mathematics and Language are presented by province and district.

COMPARISON OF PERFORMANCE BETWEEN PUBLIC AND INDEPENDENT SCHOOLS

Independent schools that considered applying for government subsidy were required to take part in ANA and others volunteered to take part on their own. Results for Grades 3 and 6 are compared for independent and public schools in Tables below:

Average % marks in Mathematics by grade and school type

GRADE	PUBLIC	INDEPENDENT
3 ocistailuted	53.3	57.7
6	39.0	49.3

Average % marks in Home Language by school type for Grade 3

GRADE	PUBLIC	INDEPENDENT
3	51.0	54.1
6	58.5	66.9

Average % marks in First Additional Language by school type for Grade 6

GRADE	FIRST ADDITIONAL LANGUAGE		
	PUBLIC	INDEPENDENT	
Gernal Con	ayle 45.8 de	57.8 Col	

Learners in independent schools achieved slightly higher scores than learner in public schools.

AVERAGE PERCENTAGE MARKS FOR INDEPENDENT SCHOOLS

SUBJECT	GRADE	PUBLIC	INDEPENDENT
MATHEMATICS	3	53.3	57.7
	6	39	49.3
HOME LANGUAGE	3	51	54.1
	6	58.5	66.9

PERFORMANCE OF SPECIAL SCHOOLS

The tables below indicate the achievement of learners in special schools for Grades 3 and 6 in Mathematics and Languages. The average marks are represented as percentages in Tables. Due to the varying nature of special needs among participating schools, there may be variances in the provincial average percentages reflected in the tables below.

AVERAGE PERCENTAGE MARK FOR GRADE 3 IN SPECIAL SCHOOLS

PROVINCE	HOME LANGUAGE	MATHEMATICS
EC	54.1	63.9
FS	38.6	36.7
GP	46.5	53.5
KZ	52.9	58
LP	32.1	32.8
MP	*	46.2
NC	50.7	62.4
NW	39.8	46.1
WC	52.4	60.7
National	48.6	54.6

^{*} There were no participating learners for this subject.

In general, learners in special schools in Grade 3 performed slightly better in Mathematics than in Home Languages. The performance of learners was about the same as the national average.

AVERAGE PERCENTAGE MARK FOR GRADE 6 IN SPECIAL SCHOOLS

PROVINCE	HOME LANG	FIRST ADD LANG	MATHEMATICS
EC	56.7	35.7	21.0
FS	63.7	28.4	35.2
GP	56.3	35.6	34.9
KZ	64.9	43.4	44.8
LP	33.7	*	26.6
MP	*	26.7	17.7
NC	50.5	*	37.8
NW	63.4	52.3	50.2
wc	57.7	41.3	35.2
National	57.0	39.5	35.8

^{*} There were no participating learners for this subject.

As for grade 3, learners in special schools in Grade 6 performed at about the same level as the national average of mainstream schools.

SUMMARY

In lower grades, more learners were attaining acceptable achievement levels than in higher grades. More learners were attaining acceptable achievement levels in Language than in Mathematics. In First Additional Language learners did not perform as well as in Home Language. Learners in independent schools performed slightly better than learners in public schools. Learners in special schools achieved at about the same level as learners in mainstream schools.

Achievement in 2013 may be compared to the targets set for Grades 3 and 6 in the *Action Plan*. The targets were reached for Grade 3 Mathematics and Language. For Grade 6 Home Language, the target was reached and surpassed. For Mathematics and First Additional Language performance fell below the targets.

CONCLUSION AND WAY FORWARD

The ANA 2013 has been remarkable, both for the manner in which it was conducted and the results that it made available. This was the largest assessment that involved primary and secondary schools as well as independent schools in South Africa. Altogether more than 27 000 schools and 7 million learners participated in the ANA 2013. Principals and teachers of the schools, district, provincial and national officials as well as the 2 000 independent field workers all contributed to making the assessment a resounding success. By ordinary standards, an operation of this magnitude would potentially be fraught with challenges. It was remarkable that ANA 2013 was undertaken and completed with minimal disruption. Notwithstanding identified gaps and alignment challenges in the purpose and design of the assessment, there is ample evidence to show that appropriate foundations have been laid for a smooth conduct of large-scale assessments in the system and these will need to be maintained and enhanced.

The outcomes of the assessment have not only added an important empirical dimension to the challenges that the DBE has been addressing in the past three years, but have also thrown light on critical areas that call for new and innovative approaches in order to ensure that every South African child has access to basic education of a high quality. In most of the grades that were tested the proportion of learners who achieved acceptable levels in literacy and numeracy has either remained the same or has increased. This is particularly so in the foundation phase. Unfortunately in a few grades at both the intermediate and senior phases, achievement seems to have remained at low levels and this poses a serious challenge.

Given the strategic importance of Mathematics for a world that has a technological slant and the critical transition that Grade 9 provides into Further Education and Training (FET), focused intervention to improve the quality of teaching and learning in the senior phase must be a national priority. The assessment has again highlighted the perennial challenges that face the larger and more rural provinces like Limpopo, Eastern Cape and KwaZulu-Natal. The unique problems that compromise the quality of teaching and learning in these provinces continue to be reflected in the relatively lower levels of performance of their learners.

Specific interventions that the DBE and the provinces will focus on include both short- and long-term term programmes.

Short-term programmes include the following:

Feedback to schools, districts and provinces from an item-level diagnostic analysis of what learners were able or not able to demonstrate in the tests in terms of requisite knowledge and skills at each grade level.

The Department has put in place a comprehensive plan that includes detailed curriculum interventions, step by- step guidance to teachers on how to mediate in the identified areas of challenge as well as pedagogic guidelines on how to teach specific concepts in the curriculum. This plan will roll out at the beginning of 2014.

Guidelines and exemplars are to use by schools and district officials to analyse assessment data, both from ANA and other local assessments. Through regular use of assessment data, schools and districts will be able to monitor learner performance and set improvement targets. The test exemplars will provide teachers with examples of the standard of assessment to be set in the class on a continuous basis.

A comprehensive school readiness programme to ensure that teaching and learning commence on the first day of the new academic year in every school. The programme includes monitoring to confirm that every school principal has obtained the necessary resources, learning and teaching support materials (LTSM), departmental workbooks, where appropriate, and that the school will begin with the required staff compliment in 2014. Proper instructional management will create conducive environment for schools to incorporate the ANA results into their teaching programmes and use differentiated strategies to support each learner according to their identified learning needs.

Rollout of the **Literacy and Numeracy Strategy:** The DBE has developed a detailed Literacy and Numeracy Strategy which will focus on, among others, early teaching of reading and mental mathematics in primary schools. This project is at an advanced stage and will draw heavily from the ANA 2013 results as a baseline.

Long-term programmes include:

Strengthening of ANA design. The DBE is exploring more robust designs that will assist to collect assessment data for systemic and diagnostic reports using specially designed set of tests. This design will begin immediately and will be implemented by 2015.
