

## **CHIEF MARKER'S REPORT**

<b>SUBJECT:</b>	<b>TECHNOLOGY</b>
-----------------	-------------------

<b>GRADE:</b>	<b>ABET LEVEL 4</b>	<b>PAPER:</b>	<b>1</b>
---------------	---------------------	---------------	----------

### **1. ANALYSIS OF QUESTION BY QUESTION PERFORMANCE**

#### **QUESTION 1**

It is a fair question paper. The standard is up to the learner level. It follows the same trend as the previous years question papers. For question 1 learners have the content of this LA. Performance is good, but some learners relied on guess work.

#### **QUESTION 2**

My assessment is that learners relied too much on answering without paying attention to the question. The performance is good in this question. Some learners got confused with the matching/columns. Educators need to assist learners in approaching ballot or multiple type questions in their revision of question papers.

#### **QUESTION 3**

The performance of learners in this question is good. Some learners however don't want to think on their own and rely on guessing. . The learners also lack concentration. This question is straightforward and understandable.

#### **QUESTION 4**

The performance of the learners in this question is the best of all questions answered. The problem for learners was in associating the equipment with relevant activities. Learners have applied their general knowledge and experiences in answering this question.

## **QUESTION 5**

Learners have a good understanding of the pictures and are able to associate them with the relevant questions. Their only problem is the language/grammar when answering questions on the observation in question 5.

### **7. ANY ADVICE THAT YOU COULD GIVE TO EDUCATORS TO HELP LEARNERS TO REACH THE EXPECTED LEVELS**

Educators did a great job judging on the overall performance of the learners. A few areas need to improve e.g. educators need to teach the learners how to match columns. Educators must also teach their learners how to number their answers and how to draw diagrams.

### **8. ANY OTHER COMMENTS**

The examiners who set this paper must keep up the good standard. This question paper really accommodates all learners. Seemingly educators and learners did their part because most learners this year have obtained more than 40%. Other learners passed with flying colours. The marking went very well. It was accurate and neatly done.
