Basic Education
REPUBLIC OF SOUTH AFRICA

AGRICULTURAL SCIENCES

EXAMINATION GUIDELINES

GRADE 12

2014

These guidelines consist of 22 pages.

TABLE OF CONTENTS

1. INTRODUCTION

The Curriculum and Assessment Policy Statement (CAPS) for Agricultural Sciences outlines the nature and purpose of the subject Agricultural Sciences. This guides the philosophy underlying the teaching and assessment of the subject in Grade 12.

The purpose of these Examination Guidelines is to:

- Provide clarity on the depth and scope of the content to be assessed in the Grade 12 National Senior Certificate (NSC) Examination in Agricultural Sciences.
- Assist teachers to adequately prepare learners for the examinations.

This document deals with the final Grade 12 external examinations. It does not deal in any depth with the School-Based Assessment (SBA).

These Examination Guidelines should be read in conjunction with:

- *The National Curriculum Statement (NCS) Curriculum and Assessment Policy Statement (CAPS):* Agricultural Sciences
- The National Protocol of Assessment: *An addendum to the policy document, the National Senior Certificate: A qualification at Level 4 on the National Qualifications Framework (NQF), regarding the National Protocol for Assessment (Grades R–12)*
- The national policy pertaining to the programme and promotion requirements of the National Curriculum Statement, Grades R–12

2. ASSESSMENT IN GRADE 12

2.1 FORMAT OF THE QUESTION PAPERS FOR THE EXTERNAL EXAMINATIONS IN GRADE 12

In Grade 12 the formal school-based assessment (SBA) constitutes 25% of the final mark. It is set and marked internally and moderated externally. The remaining 75% of the final mark for certification in Grade 12 consists of a national examination which is set, marked and moderated externally. This external examination consists of TWO PAPERS of 150 marks each. The grand total is 300 marks.

The basic outline of these papers is indicated below:

PAPER 1			
Duration: 2½ Hours			
Main topic	SECTION A	SECTION B	TOTAL MARKS
• Animal Nutrition • Animal Production, Protection and Control • Reproduction	QUESTION 1 **45** Multiple choice, terminology, column/match type and term replacement	QUESTION 2–4 **105** (35 marks/question) Each of the main topics per question	**150**

PAPER 2			
Duration: 2½ Hours			
Main topic	SECTION A	SECTION B	TOTAL MARKS
• Agricultural Management and Marketing • Production factors • Basic Agricultural Genetics	QUESTION 1 **45** Multiple choice, terminology, column/match type and term replacement	QUESTION 2–4 **105** (35 marks/question) Each of the main topics per question	**150**

Basic format and outline of the national question papers for Agricultural Sciences
SECTION A for PAPER 1:

This section consists of multiple-choice questions, column/match-type questions, terminology questions and term replacement questions. There must be an equal distribution of marks between the main topics (Animal Nutrition, Animal Production, Protection and Control and Reproduction) for these questions. Each of these main topics will be allocated 15 marks.

The following provides an indication of the format, outline, instruction, number of questions per subquestions and mark allocation for SECTION A:

SECTION A

QUESTION 1

There will be four different types of short questions that will be based on the following sequence:

Multiple-choice questions:

1.1 Various options are provided as possible answers to the following questions. Choose the answer and write only the letter (A–D) next to the question number (1.1.1–1.1.10) in the ANSWER BOOK, for example 1.1.11 D.

1.1.1 → 1.1.10 (10 x 2) (20)

FOUR possible answers are provided per question and indicated as follows:
A …….
B …….
C …….
D …….

Column/Match-type questions:

1.2 Indicate whether each of the descriptions in COLUMN B applies to **A ONLY**, **B ONLY**, **BOTH A AND B** or **NONE** of the items in COLUMN A. Write **A only**, **B only**, **both A and B** or **none** next to the question number (1.2.1–1.2.5) in the ANSWER BOOK, for example 1.2.6 B only.

TWO answers indicated by A and B in COLUMN A and a description indicated in COLUMN B.

EXAMPLE:

COLUMN A			COLUMN B
1.2.6	A:	Heartwater	A tick-borne disease transmitted by the blue tick
	B:	Redwater	

ANSWER: 1.2.6 B only

1.2.1 → 1.2.5 (5 x 2) (10)

Terminology questions:

1.3 Write the agricultural term/phrase for each of the following descriptions next to the question number (1.2.1–1.2.5) in the ANSWER BOOK.

1.3.1 → 1.3.5 (5 x 2) (10)

Term replacement questions:

1.4 Change the UNDERLINED WORD(S) in each of the following statements to make the statements TRUE. Write only the correct word(s) next to the question number (1.4.1–1.4.5) in the ANSWER BOOK.

1.4.1 → 1.4.5 (5 x 1) (5)
[45]

SECTION A for PAPER 2:

This section consists of multiple-choice questions, column/match-type questions, terminology questions and term replacement questions. There must be an equal distribution of marks among the main topics (Agricultural Management and Marketing, Production Factors and Basic Agricultural Genetics) for these questions. Each of these main topics will be allocated 15 marks.

The following provides an indication of the format, outline, instruction, number of questions per subquestions and mark allocation for SECTION A:

SECTION A

There will be four different types of short questions that will be based on the following sequence:

QUESTION 1

Multiple-choice questions:

1.1 Various options are provided as possible answers to the following questions. Choose the answer and write only the letter (A–D) next to the question number (1.1.1–1.1.10) in the ANSWER BOOK, for example 1.1.11 D.

1.1.1 → 1.1.10 (10 x 2) (20)

FOUR possible answers are provided per question and indicated as follows:
A …….
B …….
C …….
D …….

Column/Match type questions:

1.2 Choose a term/phrase from COLUMN B that matches a description in COLUMN A. Write only the letter (A–J) next to the question number (1.2.1–1.2.5) in the ANSWER BOOK, for example 1.2.6 K.

1.2.1 → 1.2.5 (5 x 2) (10)

Only ten items marked A to J are added in COLUMN B as distractors for the descriptions in COLUMN A.

Terminology questions:

1.3 Write the agricultural term/phrase for each of the following descriptions next to the question number (1.2.1–1.2.5) in the ANSWER BOOK:

1.3.1 → 1.3.5 (5 x 2) (10)

Term replacement questions:

1.4 Change the UNDERLINED WORD(S) in each of the following statements to make the statements TRUE. Write only the correct word(s) next to the question number (1.4.1–1.4.5) in the ANSWER BOOK.

1.4.1 → 1.4.5 (5 x 1) (5)
[45]

SECTION B for PAPER 1:

All questions are completed by candidates and in each question it is indicated that the candidates must start this question on a new page (Start this question on a NEW page).

QUESTION 2: ANIMAL NUTRITION

Questions covering most of the following main content areas and numbered as 2.1, 2.2, 2.3, etc. with subquestions numbered as a three-digit numbering system (example 2.1.1).
Content areas are indicated in the annual teaching plan of the CAPS document for Agricultural Sciences. [35]

QUESTION 3: ANIMAL PRODUCTION, PROTECTION AND CONTROL

Questions covering most of the following main content areas and numbered as 3.1, 3.2, 3.3, etc. with subquestions numbered as a three-digit numbering system (example 3.1.1).
Content areas are indicated in annual teaching plan of the CAPS document for Agricultural Sciences. [35]

QUESTION 4: ANIMAL REPRODUCTION

Questions covering most of the following main content areas and numbered as 4.1, 4.2, 4.3, etc. with subquestions numbered as a three-digit numbering system (example 4.1.1).
Content areas are indicated in annual teaching plan of the CAPS document for Agricultural Sciences. [35]

GRAND TOTAL: 150

SECTION B for PAPER 2:

All questions are completed by candidates and at each question it is indicated the candidates must start this question on a new page (Start this question on a NEW page).

QUESTION 2: AGRICULTURAL MANAGEMENT AND MARKETING

Questions covering most of the following main content areas and numbered as 2.1, 2.2, 2.3, etc. with subquestions numbered as a three-digit numbering system (example 2.1.1).
Content areas are indicated in annual teaching plan of the CAPS document for Agricultural Sciences. [35]

QUESTION 3: PRODUCTION FACTORS

Questions covering most of the following main content areas and numbered as 3.1, 3.2, 3.3, etc. with subquestions numbered as a three-digit numbering system (example 3.1.1).
Content areas are indicated in annual teaching plan of the CAPS document for Agricultural Sciences. [35]

QUESTION 4: BASIC AGRICULTURAL GENETICS

Questions covering most of the following main content areas and numbered as 4.1, 4.2, 4.3, etc. with subquestions numbered as a three-digit numbering system (example 4.1.1).
Content areas are indicated in annual teaching plan of the CAPS document for Agricultural Sciences. [35]

GRAND TOTAL: 150

2.2 COGNITIVE LEVEL WEIGHTING:

The following table provides a guide for the cognitive level weighting applicable to Paper 1 and Paper 2. The key verb is used as a guide to judge the appropriate cognitive level of a question. The context of the question will provide more details to measure the level of difficulty of a question to place it at the most appropriate level. The marks per cognitive level need to reflect the overall cognitive balance as a percentage (40% knowledge, 40% comprehension and application and 20% analysis, synthesis and evaluation) for each of the question papers. The cognitive levels will be scaffolded within a question.

Cognitive levels, context words and key verbs for paper 1 and paper 2

COGNITIVE LEVEL WEIGHTING %	CONTEXT WORDS	KEY VERBS
A 40%	***Knowledge***	Name, State, Give, Indicate, Provide, Arrange, Define, Label, List, Outline, Locate, Recognise, Select, State and Supply
B 40%	***Comprehension and Application***	Describe, Identify, Restate, Review, Summarise, Classify, Compare, Define, Distinguish, Interpret, Match and Select, Apply, Calculate, Draw, Explain, Identify, Illustrate, Prepare, Operate, Practice, Solve, Draw (Sketch), Modify, Adapt, Compute, Discover, Survey, Gather, Prepare, Use and Show
C **20%**	***Analysis***	Analysis, Categorise, Compare, Distinguish, Discuss, Examine, Investigate, Test, Deduce, Distinguish, Relate, Classify, Contrast, Explain, Generalise, Predict and Solve
	Synthesis	Arrange, Compose, Formulate, Organise, Plan, Assemble, Construct, Combine, Create, Depict, Design, Develop, Incorporate, Integrate, Invent, Predict, Produce and Structure
	Evaluation	Appraise, Assess, Comment on, Critically analyse, Evaluate, Conclude, Interrogate, Judge, Predict, Compare, Score, Justify, Critique and Recommend

THE LEVEL OF DIFFICULTY

Each of the cognitive levels A (basic knowledge), B (comprehension and application) and C (analysis, synthesis and evaluation) are mainly determined by the key verbs used in the questions. The level of difficulty for each of these categories must also be judged based on the context of each question. The level of difficulty would fall into three different categories for each of the cognitive levels as difficult, moderate and easy. The weighting of these categories should be equal for each of the cognitive levels.

The following contextual issues need to be considered when assessing a question for it level of difficulty:

- The detail of the knowledge or concepts required in the responses
- The amount/quantity of knowledge or concepts that is needed in the responses
- The complexity of the knowledge or concepts that is required in the responses
- The type and complexity of skills needed to complete the question
- The complexity of the phrasing of a question
- The level of extended thinking needed to respond to a question
- The basic context of a question

Each of the contextual issues above needs to be carefully evaluated in each question to make a judgement on the level of difficulty of a question. This classification of questions needs to be justified by the expected performances and perception of candidates to them.

Refer to the exemplar question paper for some examples in this regard.

3. ELABORATION OF THE CONTENT FOR GRADE 12 (CAPS)

The following tables provide a brief outline of the content coverage for PAPER 1 and PAPER 2. The total marks for each of the main topics need to be added together for each paper to measure the content distribution of each paper.

PAPER 1	
Main topic	**Mark allocation**
• Animal Nutrition	50
• Animal Production, Protection and Control	50
• Animal Reproduction	50
TOTAL MARKS	**150**

PAPER 2	
Main topic	**Mark allocation**
• Agricultural Management and Marketing	50
• Production factors	50
• Basic Agricultural Genetics	50
TOTAL MARKS	**150**

BASIC SKILLS LINKED TO THE SUBJECT:

The following skills are measured in PAPER 1 and PAPER 2. Visibility of these skills gives an indication of the overall skills required in the subject:

- Ability to follow instructions
- Identifying labels/labelling/making drawings/diagrams/schematic representations
- Plotting and interpretation of graphs/data
- Working out and interpreting calculations
- Organising/Recording and categorising data
- Extraction and/or manipulation and/or evaluation of data
- Hypothesis testing/Using scientific methods

NOTE:

Calculations	Graphs
Generally the criteria used for calculations are as follows: • Correct formula • Substitution of values • Simplifying of values • Answer and correct units • Proportionality (e.g. fodder flow) At least two calculations per question paper should be expected	Graphs will be assessed according to the following criteria: • Type of graph(line/bar) • Correct heading • Correct plotting of values (correct values, proportional plotting) • Labelling and units on Y-axis • Labelling and units on X-axis

ANIMAL STUDIES: PAPER 1

Animal Nutrition

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Animal nutrition	• Compare the external structure of the alimentary canal of a ruminant (cow and sheep) and non-ruminant (fowl and pig) • Functions and adaptations of various structures of the alimentary canal • Description of the internal structure of the rumen, reticulum, omasum, abomasum and small intestines	Examples of questions in previous question papers
Digestion in the non-ruminant (pig/fowl) and ruminants (cow)	Digestion in non-ruminants • A brief explanation of the intake of feed • The mechanical and/or chemical (enzymes) digestion processes in the mouth, stomach, small intestine and the large intestine: • Functions of the salivary glands, the liver, pancreas and intestinal glands (accessory glands). Digestion in ruminants • Definitions of rumination, regurgitation and peristalsis • Explanation of the intake of food and the chewing of the cud • The differences in size and functionality of the four stomach compartments of a mature ruminant compared to a young ruminant Digestion in the rumen • Describe rumen microbes as single celled organisms found in the reticulo-rumen • Briefly classify the different types of rumen microbes • Describe the most important requirements for normal functioning of rumen microbes/microorganisms • Name the functions of the rumen microbes • Explain the absorption of food in the rumen directly by osmosis and diffusion into the blood stream	Examples of questions in previous question papers Limited examples in previous question papers
Components of feed	• Briefly describe the functions (importance) of water, proteins, carbohydrates (sugar, starch and crude fibre) and fats/oils (ether extract) in animal production and growth • Indicate the basic bio-chemical functions, importance and deficiencies of the macro-elements (calcium, phosphorus, magnesium, sodium, chlorine, potassium, sulphur) and trace-elements (iron, iodine, zinc, selenium, copper, cobalt) • Briefly indicate the basic functions and two deficiencies of water-soluble vitamins (B1; B2 ; B6 and B12 /Vitamin B complex) and fat-soluble vitamins (A, D, E and K)	Examples of questions in previous question papers

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Digestibility of feeds	• Define the digestibility and digestibility coefficient of feeds • List the factors that affect/influence/determine the digestibility of feeds • Describe the methods used to improve/increase the digestibility of feeds • Calculate and interpret the digestibility coefficient of a feed	Examples of questions in previous question papers
Quality of feed, energy value of feeds and nutritive ratio	Quality of feed: biological value of proteins • Define the concept of biological value (BV), essential amino-acid index and ideal proteins • Explain the importance of animal proteins in rations • Evaluate a feed protein in terms of biological value (egg protein and milk protein] Energy value of feed • Name the units in which energy value is expressed • Define and outline gross energy, metabolic energy, digestible and net energy • Describe the purpose/aims of calculating energy value of the feed • Identify and draw a schematic representation of feed energy flow • Calculate the feed energy flow and interpret the results Nutritive ratio • Define the concept of nutritive ratio (NR) • Describe the purpose/aims of the nutritive ratio in animal feeding • Calculate and interpret the nutritive value of a feed	Examples of questions in previous question papers
Types of feed	• Illustrate the basic classification of animal feeds • Define roughages and concentrates • Name the characteristics of roughages and concentrates • Describe the different types of roughages and concentrates • Make a schematic representation of different types of animal feeds • List the main functions (importance) of roughages and concentrates	Examples of questions in previous question papers
Subdivision of feeds **Planning a feed flow programme**	• Compare and give examples of protein-rich and carbohydrate-rich feeds Supplements to rations • Indicate the different ways of supplementing: minerals, vitamins, non-protein nitrogen and growth stimulants Planning a feed flow programme • Define and describe a feed-flow program, maintenance and production ration • A brief overview of the Pearson square method (feed formulation) • Calculate and drawing the feed requirements using a single Pearson square method • Interpret the Pearson square results for feed mixtures • Interpret and describe a fodder/feed flow/fodder production planning • Explain the importance of fodder flow/fodder production planning • Do a basic calculation of a feed/fodder flow program for a group of livestock (number of animals and feed needed over a period of time)	Examples of questions in previous question papers

Animal Production, Protection and Control

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Animal production Increasing animal production	Animal production systems • Describe and compare intensive and extensive animal production systems • List the differences between small-scale/subsistence and large-scale/commercial farming systems	Examples of questions in previous question papers
Intensive farming	Study examples of intensive farming productions including broiler production, battery system, feedlots and a piggery • Describe how factors like nutrition/feeding, environment, reproduction/breeding and general enterprise management are used to increase animal production under intensive farming (broiler production)	No or limited examples of questions in previous question papers
Extensive farming	• Study examples of extensive farming productions including sheep farming, beef production and poultry production • Describe how factors like nutrition/feeding, environment, reproduction/breeding and general enterprise management are used to increase animal production in extensive farming (beef production)	No or limited examples of questions in previous question papers
Animal shelter/ protection/housing	• Give the importance or reasons for shelter/housing • Identify different structures used for sheltering/housing livestock in an intensive animal production system • Identify and describe different intensive production systems like a backyard system, intensive/semi-intensive system and a free range systems for poultry, pigs or dairy production • List the basic housing or shelter requirements/guidelines for an intensive production system like a holding shed, feed shed and holding pens • Identify and describe the different equipment/tools for intensive housing systems like feeders, water supply, bedding and lighting	Some examples of questions in previous question papers No or limited examples of questions in previous question papers
Behaviour and handling of farm animals	Behaviour of farm animals • Describe the common behaviours of cattle, sheep, pigs and poultry under various conditions • Handling of farm animals • Give the reasons/importance of handling farm animals • Describe the effect of incorrect handling on farm animals (harm and effect) • State the basic guidelines for handling cattle, sheep, pigs and poultry • Identify and describe the different techniques/tools/aids utilised to handle farm animals • List the basic guidelines/requirements for transporting/moving farm animals from one farm to another/abattoirs	Limited examples of questions in previous question papers

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Animal diseases and protection	Animal health • Describe the signs of poor health/sick animals (cattle, pigs and chickens) • Name and describe the methods of testing animal health • List the various methods of administering medicine to animals (cattle, pigs and chickens) • Describe the sustainable use of medication • Distinguish between infectious, non-infectious and metabolic animal diseases • Identify and describe the level of seriousness of animal disease(chronic, per-acute and acute) Animal diseases • Indicate the main micro-organisms causing diseases in animals • Identify the most important diseases in South Africa based on the mode of transmission, animal host, symptoms and treatment:	Some examples of questions in previous question papers
Viral and bacterial diseases	• Evaluate viral diseases like foot and mouth disease (FMD), rabies, Rift Valley fever (RVF), avian/bird flu, swine fever/flu and Newcastle disease (NCD) • Describe bacterial diseases like anthrax, mastitis and tuberculosis (TB)	Some examples of questions in previous question papers
Protozoan and fungal diseases	• Indicate protozoan diseases like anaplasmosis, redwater, heartwater and coccidiosis • Describe fungal diseases like lumpy wool and ringworm • Identify and explain the economic implications of these animal diseases • Describe the preventative/control measures for animal diseases	Some examples of questions in previous question papers
Internal parasites/ endoparasites	• Define the meaning of internal parasite • Identify and describe the main groups of internal parasites like tapeworms, liver fluke and roundworms • Describe the life cycles, animal hosts, symptoms and treatment of tapeworms, liver fluke and roundworms. • Identify and explain the financial implications and detrimental effect of internal parasites • Describe the basic preventative/control measures of internal parasites	Some examples of questions in previous question papers
External parasites/ ectoparasites	• Define an external parasite • Distinguish between ticks, nasal worm blowflies, lice and mites as examples of external parasites • Identify and describe the life cycle of ticks (single/two/three host ticks), nasal worm (sheep); and blowflies, lice and mites (sheep). • Identify and describe the financial implications and detrimental effect of external parasites • Indicate the basic preventative/control measures of external parasites	Some examples of questions in previous question papers

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Plant and metallic salt poisoning	• Identify and describe the maize fungus, poison bulb, thorn apple as examples of plant poisoning • Discuss the treatment of animals suffering from plant poisoning • Describe the preventative/control measures of plant poisoning • Identify and describe common salt and urea poisoning (the symptoms and treatment) • Indicate the preventative/control measures of salt poisoning • Describe the basic principles of good health to control animal diseases and parasites/pests • Indicate the role of the state in animal protection	No or limited examples of questions in previous question papers

NOTE: For examination purposes diseases will be assessed as indicated in the table below:

Aspect	Types of diseases			
	Viral	**Bacterial**	**Protozoan**	**Fungal**
1.Type of animal infected	Rabies	Mastitis	Heartwater	Ringworm
2. Transmitting agent	RVF, Rabies, FMD	Anthrax	Anaplasmosis	Ringworm
3. Symptoms	FMD,NCD	TB	Heartwater	Lumpy wool
4. Control/Preventative measures	Rabies, swine flu, avian flu	Mastitis	Anaplasmosis	Lumpy wool
5.Treatment	RVF	Anthrax	Coccidiosis	Ringworm
6. Economic importance	FMD, RVF, avian flu, swine flu	Mastitis	Redwater	Lumpy wool

NOTE: For examination purposes parasites will be assessed as indicated in the table below:

Aspect	Types of parasites	
	Internal	**External**
1.Type of animal infected	Liver fluke, roundworm	Nasal worm
2. Life cycle	Tapeworm	Ticks , blowflies
3. Control/Preventative measures	Roundworms, tapeworm	Mites
4. Treatment	Liver fluke	Ticks
5. Economic implications	Tapeworm, roundworm	Ticks, mites

Animal Reproduction

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Animal reproduction **Male and female reproductive systems**	Reproductive organs of cattle • Differentiate between the primary and secondary male reproductive organs/structures • List the functions of the testes, epididymis, scrotum and the accessory sex glands (vesicular glands; prostate; Cowper's gland) • Describe the process of sperm formation (spermatogenesis) and identify the schematic representation of spermatogenesis • State the factors causing sterility and infertility in bulls • Identify and describe the primary and secondary female reproductive organs (structure) • Indicate the functions of the ovaries, fallopian tubes, uterus and vagina • Describe the process of ovigenesis/oogenesis and identify the schematic representation of ovigenesis/oogenesis	Some examples of questions in previous question papers
Oestrus and oestrus cycle	• Define oestrus or the heat period • Identify and describe the female sex hormones and their respective functions • Indicate and describe the periods/stages/phases of the oestrus cycle in cows • List the noticeable signs/characteristics of oestrus in cows • Describe the practical methods dairy farmers can adopt to assist in identifying cows on heat	Some examples of questions in previous question papers
Synchronisation of oestrus and mating	• Define the concept of the synchronisation of oestrus/heat • Briefly describe the various techniques/methods of synchronization of oestrus/heat • List the advantages and disadvantages of synchronisation of oestrus • Describe the basic factors causing sterility and infertility in females (cow) • Define mating/copulation and ejaculation • Describe the natural mating be referring to the male sexual display/courtship behaviour/pattern, factors that regulate mating behaviour among bulls and the five main stages of mating/copulation	No or limited examples of questions in previous question papers
Artificial mating (Artificial insemination, embryo transplantation and cloning)	• Define artificial insemination • Indicate the main requirements for successful AI • List the advantages and disadvantages of AI • Describe the collecting of semen by using an artificial vagina or electrical stimulation/electro-ejaculator • State the basic requirements for semen collection and storage • Describe the characteristics of good quality semen (semen evaluation) • Describe the dilutants and functions of such dilutants • Identify the correct time for artificial insemination (timing for AI) • Indicate and describe the correct technique for carrying out AI	Some examples of questions in previous question papers

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Embryo transplantation/ transfer (ET)	• Identify and define the embryo transplantation/transfer (ET), superovulation, embryo flushing/ harvesting, donor cows, recipient cows • Describe the aims/purposes of ET and embryo flushing/harvesting • List the advantages and disadvantages of ET	No or limited examples of questions in previous question papers
Nuclear transfer (Cloning)	• Define nuclear transfer/cloning • List the aims/purposes of animal cloning • Distinguish between reproductive cloning and therapeutic cloning • Indicate the advantages and disadvantages of cloning	No or limited examples of questions in previous question papers
Fertilisation and pregnancy	• Identify and define fertilisation, pregnancy/gestation, freemartins and placenta • Describe the fertilisation process • Describe the formation of multiple births (twins) and freemartins • Identify the phases/stages of pregnancy • Give the main reasons for abortions	
Birth/parturition and dystocia	• Define the parturition/birth, dystocia • List the signs/characteristics of a cow approaching parturition • State the functions of the layers covering the foetus • Indicate the stages/phases of parturition • Identify and describe the correct birth positions of a calf in the uterus just before birth • Name the conditions which interfere with normal parturition process • Describe the principal factors causing the retention of the placenta/afterbirth in cows	Some examples of questions in previous question papers
Milk Production/ lactation	• Identify and define the lactation, dry period and milk ejection • Identify and describe the structure of the udder of a cow (functions) • Discuss the milk ejection/milk let down process and hormones involved • Explain the importance and functions of colostrum to the new born calf • Identify and describe the interpretation of the lactation curve and lactation cycle (period)	Some examples of questions in previous question papers

AGRICULTURAL MANAGEMENT & MARKETING, PRODUCTION FACTORS AND BASIC AGRICULTURAL GENETICS: PAPER 2

Agricultural Management and Marketing

MAIN CONTENT TOPIC	SUGGESTED CONTENT	COMMENTS
Agricultural marketing	• Define the market/marketing • Distinguish between marketing and selling • List, identify and describe the main functions of agricultural marketing (transport, storage, packaging and processing/value adding) • Price determination and demand/supply • Define and describe demand and supply, • Explain and interpret the law of demand and supply (the interpretation of the demand and supply curve/graph) • Identify and explain the factors influencing the demand and supply of a product • Identify and describe the price elasticity of demand/supply and price inelasticity of demand/supply	Some examples of questions in previous question papers
Market equilibrium	• Define market equilibrium • Interpret a hypothetical demand and supply curve to indicate market equilibrium • Interpret the market equilibrium • Describe the development of a market • Describe the importance of a market with regards to fixed prices, type of buyers and methods to promote products • List the approaches to marketing including mass marketing and multi-segment marketing • Identify and explain sustainable agricultural marketing (green markets, eco-labelling)	Some examples of questions in previous question papers
Agricultural marketing systems	Free-marketing • Define the concept of free marketing • Indicate the general advantages and disadvantages of a free-market system • Identify and describe the main channels/options of a free-market system and their advantages and disadvantages (farm-gate market, fresh-produce markets, stock sales, direct marketing and Internet marketing) Co-operative marketing • Define the concept of agricultural co-operatives and their background • Describe the principles of agricultural co-operative • Name the types of agricultural co-operatives • Describe the benefits/advantages of agri-co-operatives Controlled Marketing • Describe the concept of controlled marketing Agricultural marketing chain or supply/demand chain • Identify and describe a marketing chain/supply/demand chain • List the factors that hamper the marketing chain of agricultural products • Indicate the ways to streamline and improve the agri-business chain • Briefly describe the role of legislation in the effective marketing of agricultural products	Some examples of questions in previous question papers

MAIN CONTENT TOPIC	SUGGESTED CONTENT	COMMENTS
Agricultural entrepreneurship and business planning	• Define an entrepreneur and entrepreneurship • Describe the important aspects of the entrepreneur and entrepreneurship • Describe the entrepreneurial success factors or personal characteristics • Identify the main distinct phases of the entrepreneurial process Agri-business plan • Define and outline a business plan • Identify and indicate the reasons for drawing up a business plan in the agricultural sector • Outline the standard format and layout (components) of an agricultural business plan • Indicate the problems encountered when drawing up an agri-business plan • Identify electronic resources used as a tool for drawing up an agri-business plan • Describe a basic SWOT analysis	Some examples of questions in previous question papers

Production factors

MAIN CONTENT TOPIC	SUGGESTED CONTENT	COMMENTS
Agric-production factors **Land and labour**	Land • Identify the functions of land (in economic terms) • Indicate the economic characteristics of land as a production factor • Describe the techniques/methods of increasing land productivity Labour • Define the term labour • Describe the different types of labour in agriculture (with relevant examples) • Identify and describe the problems associated with labour in agriculture • Indicate the methods for increasing labour productivity • Identify the labour legislation Acts affecting farm workers in South Africa [LRA, BCEA, OHSA, COIA and SDA] • Describe the standard format and layout (components) of a labour/farm worker contract	Some examples of questions in previous question papers

MAIN CONTENT TOPIC	SUGGESTED CONTENT	COMMENTS
Capital and management	Capital • Define the following terms: capital, assets, cash flow, budgets • Identify and describe the types of capital (with relevant examples) • List the methods of creating capital • Identify and describe the sources of finance/credit (long-term, medium-term and short-term credit) • Indicate the problems associated with capital as a production factor • Identify and describe the capital/financial management systems including financial records, farm asset records and farm budgets • Indicate the differences between an enterprise budget and a whole farm budget (example of farm budget) • Identify the components of a cash flow statement • State the main aspects which are included in a cash flow budget statement Management • Define the concept of farm management/management, strategic farm risk management • Identify and explain the principles/components of management • Indicate the general management skills needed to manage a farm business • Identify and describe the internal and external forces which affect/influence farming businesses • Discuss the primary sources of risk in farming business • Identify and discuss the main risk management strategies/techniques (diversification strategies, risk-sharing strategies)	Some examples of questions in previous question papers

Basic Agricultural Genetics

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Basic Agricultural Genetics **Monohybrid inheritance** **Dihybrid inheritance**	Genetic concepts • Define basic genetic terminology like genetics/heredity, genes, chromosomes and alleles (homozygous and heterozygous) • Distinguish between genotype and phenotype, dominant and recessive genes • Indicate a monohybrid inheritance/crosses (Mendel's First Law: Law of Segregation) • Indicate a dihybrid inheritance/dihybrid crosses (Mendel's Second Law: Law of Independent Assortment) • Use various methods, such as a Punnet square, genetic diagrams and schematic representations to illustrate the crosses • Describe Mendel's laws of segregation and independent recombination of characteristics • Distinguish between qualitative and quantitative characteristics	Some examples of questions in previous question papers
The pattern of inheritance	• Identify and describe the pattern of inheritance that leads to different phenotypes: incomplete dominance, co-dominance, multiple alleles, polygenic inheritance and epistasis • Define the concept of prepotency and atavism with relevant examples • Describe the sex chromosomes and sex-linked characteristics (examples)	Some examples of questions in previous question papers
Variation and mutation	• Define genetic terminology like variation, mutation and selection • Identify and describe the importance of variation and selection • Discuss the external (environmental) and internal (genetic) causes of variation • Identify the types of mutagenic agents and their effects (changes in chromosome structures)	Some examples of questions in previous question papers
Selection	• Indicate the general principles of selection like biometrics including heritability and estimated breeding values(EBVs) and compare natural vs. artificial selection • Indicate the selection methods used by plants and animal breeders (mass, pedigree, family and progeny selection) and breeding values • Identify and describe inbreeding, line-breeding with relevant examples, cross breeding, upgrading, species-crossing, out crossing and the advantages and disadvantages of these different breeding systems	Some examples of questions in previous question papers

MAIN TOPIC	SUGGESTED CONTENT	COMMENTS
Genetic modification/ genetic engineering	• Define the concept of genetic modification/genetic engineering in plants and animals (with relevant examples) • List the aims of genetic modification of plants and animals • Indicate the advantages of genetic engineering over traditional methods • Identify and describe the current uses/application of genetically modified plants • Indicate the techniques used to genetically modify plants/animals • Describe the potential benefits of genetically modified crops • Name the characteristics of GMO's • Indicate the potential risks of GMO's	Some examples of questions in previous question papers

4. CONCLUSION

This Examination Guidelines document is meant to articulate the assessment aspirations espoused in the CAPS document. It is therefore not a substitute for the CAPS document which educators should teach to.

Qualitative curriculum coverage as enunciated in the CAPS cannot be over-emphasised.
